Empires in World History - Jane Burbank 2021-05-11

How empires have used diversity to shape the world order for more than two millennia—vast states of territories and peoples united by force and ambition—have dominated the political landscape for more than two millennia. *Empires in World History* departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires' conquests, rivalries, and strategies of domination—with an

emphasis on how empires accommodated, created, and manipulated differences among populations. Burbank and Cooper examine Rome and China from the third century BCE, empires that sustained state power for centuries. They delve into the militant monotheism of Byzantium, the Islamic Caliphates, and the short-lived Carolingians, as well as the pragmatically tolerant rule of the Mongols and Ottomans, who combined religious protection with the politics of loyalty. Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty, the limitations and instability of Europe's colonial projects, Russia's repertoire of exploitation and differentiation, as well as the "empire of liberty"—devised by American revolutionaries and later extended across a continent and beyond. With its investigation into the relationship between diversity and imperial states, *Empires in World History* offers a fresh approach to understanding the impact of empires on the past and present.

[Empires at War](#) - Robert Gerwarth 2014-07-03

Empires at War, 1911-1923 offers a new perspective on the history of the Great War. It expands the story of the war both in time and space to include the violent conflicts that preceded and followed the First World War, from the 1911 Italian invasion of Libya to the massive violence that followed the collapse of the Ottoman, Russian, and Austrian empires until 1923. It also presents the war as a global war of empires rather than a European war between nation-states. This volume tells the story of the millions of imperial subjects called upon to defend their imperial governments' interest, the theatres of war that lay far beyond Europe, and the wartime roles and experiences of innumerable peoples from outside the European continent. *Empires at War* covers the broad, global mobilizations that saw African soldiers and Chinese labourers in the trenches of the Western Front, Indian troops in Jerusalem, and the Japanese military occupying Chinese territory. Finally, the volume shows how the war set the stage for the collapse not only of specific empires, but of the imperial world order writ large.

Man's Story - Thomas Walter Wallbank 1956

The Cambridge History of the Byzantine Empire c.500-1492 - Jonathan Shepard 2019-06-30

Byzantium lasted a thousand years, ruled to the end by self-styled 'emperors of the Romans'. It underwent kaleidoscopic territorial and structural changes, yet recovered repeatedly from disaster: even after the near-impregnable Constantinople fell in 1204, variant forms of the empire reconstituted themselves. The Cambridge History of the Byzantine Empire c.500-1492 tells the story, tracing political and military events, religious controversies and economic change. It offers clear, authoritative chapters on the main events and periods, with more detailed chapters on outlying regions and neighbouring societies and powers of Byzantium. With aids such as maps, a glossary, an alternative place-name table and references to English translations of sources, it will be valuable as an introduction. However, it also offers stimulating new approaches and important findings, making it essential reading for postgraduates and for specialists. The revised paperback edition contains a new preface by the editor and will offer an invaluable companion to survey courses in Byzantine history.

The Code of Hammurabi - Hammurabi 2019-03-04

The Code of Hammurabi is one of the most important monuments in the history of the human race. Containing as it does the laws which were enacted by a king of Babylonia in the third millennium B.C., whose rule extended over the whole of Mesopotamia from the mouths of the rivers Tigris and Euphrates to the Mediterranean coast, we must regard it with interest. But when we reflect that the ancient Hebrew tradition ascribed the migration of Abraham from Ur of the Chaldees to this very period, and clearly means to represent their tribe father as triumphing over this very same Hammurabi (Amraphel, Gen. xiv. 1), we can hardly doubt that these very laws were part of that tradition. At any rate, they must have served to mould and fix the ideas of right throughout that great empire, and so form the state of society in Canaan when, five hundred years later, the Hebrews began to dominate that region. - Taken from "The Code Of Hammurabi" written by Hammurabi
