Foundations of Nursing and First Aid - Janet S. Ross 1970

How Tobacco Smoke Causes Disease - 2010

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Never Be Sick Again - Raymond Francis 2010-01-01

One day Raymond Francis, a chemist and a graduate of MIT, found himself in a hospital, battling for his life. The diagnosis: acute chemical hepatitis, chronic fatigue, multiple chemical sensitivities, and several autoimmune syndromes, causing him to suffer fatigue, dizziness, impaired memory, heart palpitations, diarrhea, numbness, seizures and numerous other ailments. Knowing death was imminent unless he took action, Francis decided to research solutions for his disease himself. His findings and eventual recovery led him to conclude that almost all disease can be both prevented and reversed. In *Never Be Sick Again*, Francis presents a seminal work based on these findings — a revolutionary theory of health and disease: there is only one disease (malfunctioning cells), only two causes of disease (deficiency and toxicity), and six pathways to health and disease (nutrition, toxins, psychological, physical, genetic, and medical). This remarkable book answers the questions: What is health? What is disease? Why do people get sick? How can disease be prevented? How can it be reversed? It will teach readers, in one easy lesson, an entirely new way to look at health and disease — an approach that is easy to understand, yet so powerful that they may, indeed, never have to be sick again. Providing a basic understanding of health and disease, this book takes the mystery out of disease. It provides readers, no matter what their present physical condition, a holistic approach to living that will empower them to get well — and stay well.

2014-04-08

We are re-defining the face of ageing on a daily basis, with the Baby Boom generation in the vanguard, followed by younger generations who are similarly intrigued by non-invasive natural solutions that are integrative rather than purely cosmetic. Constitutional Facial Acupuncture has begun to make an impact on popular culture and outmoded perceptions about the nature of authentic beauty and the ageing process. Acupuncturists who practice in this field are increasingly expected to have specialized training and knowledge, outside the customary parameters of the more traditional approaches. This book introduces a complete Constitutional Facial Acupuncture protocol that is comprehensive, effective and clearly organized, with illustrative color photographs and facial needling diagrams. Its strong constitutional components are unique, adhere to the principles of Chinese medicine, and are rooted in the three levels of treatment - Jing, Ying and Wei. A new and detailed Constitutional Facial Acupuncture protocol highlights acu-muscle points, Shen imbalances, lines and wrinkles, needling technique, relevant points and their locations. A comprehensive constitutional treatment approach A customized, modular topical herbal protocol that is enriched with the use of essential oils and natural cleansers, creams, etc. Practical step-by-step instructions on how to integrate the needling protocols with the topical herbs, jade rollers, gem eye discs, etc. A complete Constitutional Facial Acupuncture needling protocol for 12 problematic areas of the facial landscape, i.e., droopy eyelids, sagging neck, crow's feet, sunken cheeks, etc. Contraindications, benefits, and personal advice drawn from the author's 30+ years of experience An essential text for students or practitioners of facial acupuncture, and also for those readers who are interested in the field of "healthy aging"
