Japanese Inward Investment in UK Car Manufacturing - Young-Chan Kim
2018-02-06

This title was first published in 2002. This compelling text provides fresh insight into an area that is often touched upon, but rarely examined in any great detail - the relationship between Multinational Enterprises (MNEs) and their host governments. Taking Japanese Foreign Direct Investment (FDI) strategy, arguably the model of FDI, Young-Chan Kim takes a revealing look at why the United Kingdom (UK) has dominated among the EU member states for FDI destination, while ironically losing its nationalized car manufacturers. Scholars of business history, international business and business economics will find this work invaluable.

Charging the Internal Combustion Engine - Hermann Hiereth
2007-11-04

This book covers all aspects of supercharging internal combustion engines. It details charging systems and components, the theoretical basic relations between engines and charging systems, as well as layout

and evaluation criteria for best interaction. Coverage also describes recent experiences in design and development of supercharging systems, improved graphical presentations, and most advanced calculation and simulation tools.

Optimizing the Super-turbocharged Aeroengine - Julian R. Panting
1998-03-06

Turbprop or turbojet engines are the main means of providing motive power for flight. Any improvements which can be made to these technologies in terms of power or fuel efficiency are significant and important developments. After first setting the scene with a short account of aeroengine development, the book goes on to show how a super-turbocharged aeroengine can be significantly more efficient. A

detailed account of the studies into the new design philosophy is given and the numerical results of the computational model of this engine design model are analysed. The unusual design of these piston engine units is theoretically modelled and their mechanical design is discussed in some detail. CONTENTS: Conventional jet engine performance Centrifugal supercharger Emissions Performance at altitude Axial piston engine Gas generator Turbine and high-speed alternator design Optimisation techniques Numerical modelling and results Compound turbocharged engine

Introduction to Modeling and Control of Internal Combustion Engine Systems - Lino Guzzella 2013-03-14

Internal combustion engines still have a potential for substantial improvements, particularly with regard to fuel efficiency and environmental compatibility. These goals can be achieved with help of control systems. Modeling and Control of Internal Combustion Engines (ICE) addresses these issues by offering an introduction to cost-effective model-based control system design for ICE. The primary emphasis is put on the ICE and its auxiliary devices. Mathematical models for these processes are developed in the text and selected feedforward and feedback control problems are discussed. The appendix contains a summary of the most important controller analysis and design methods, and a case study that analyzes a simplified idle-speed control problem. The book is written for students interested in the design of classical and novel ICE control systems.

On a Global Mission: The Automobiles of General Motors International Volume 3 - Louis F. Fourie 2016-12-27

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with

recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.
