

Moonrise One Family Genetic Identity And Muscular Dystrophy

Yeah, reviewing a books **Moonrise One Family Genetic Identity And Muscular Dystrophy** could mount up your near friends listings. This is just one of the solutions for you to be successful. As understood, attainment does not suggest that you have extraordinary points.

Comprehending as capably as bargain even more than other will give each success. adjacent to, the message as with ease as perspicacity of this Moonrise One Family Genetic Identity And Muscular Dystrophy can be taken as capably as picked to act.

Each Wild Idea - Geoffrey Batchen 2002-02-22

Essays on photography and the medium's history and evolving identity. In *Each Wild Idea*, Geoffrey Batchen explores a wide range of photographic subjects, from the timing of the medium's invention to the various implications of cyberculture. Along the way, he reflects on contemporary art photography, the role of the vernacular in photography's history, and the Australianness of Australian photography. The essays all focus on a consideration of specific photographs—from a humble combination of baby photos and bronzed booties to a masterwork by Alfred Stieglitz. Although Batchen views each photograph within the context of broader social and political forces, he also engages its own distinctive formal attributes. In short, he sees photography as something that is simultaneously material and cultural. In an effort to evoke the lived experience of history, he frequently relies on sheer description as the mode of analysis, insisting that we look right at—rather than beyond—the photograph being discussed. A constant theme throughout the book is the question of photography's past, present, and future identity.

Moonrise - Penny Wolfson 2004-05

The mother of a son with muscular dystrophy describes her son's diagnosis and development, the impact of the disease on her world view, the history of the disease, and what she learned about genetics in light of her son's condition. Reprint. 15,000 first printing.

Spirituality and Meaning Making in Chronic Illness - Kelly Arora 2020-02-21

Many spiritual caregivers, including chaplains, spiritual directors and clergy, are unaware of how they can support people with chronic health conditions. This book combines insights on chronic illness with spiritual care skills and suggestions to enhance well-being for people living with long-term illness. Using a narrative approach, the author reflects on the stories of two women - Dorothy from *The Wizard of Oz*, who travels from Kansas (a state of health) to Oz (an illness experience), alongside the author's personal experiences of managing an incurable autoimmune disease. Chapters will include guidelines and exercises that help equip caregivers to facilitate healing with people who live with long-term health conditions.

Philosophy for Children Through the Secondary Curriculum - Lizzy Lewis 2012-05-17

Philosophy for Children (P4C) is an approach to learning and teaching that aims to develop reasoning and judgement. Students learn to listen to and respect their peers' opinions, think creatively and work together to develop a deeper understanding of concepts central to their own lives and the subjects they are studying. With the teacher adopting the role of facilitator, a true community develops in which rich and meaningful dialogue results in enquiry of the highest order. Each chapter is written by a leading P4C expert and provides an introduction to the relationship between P4C and the subject area, lesson stimuli and activities for extending and deepening students' thinking. The book includes: • guidance on how to embed P4C in curriculum subjects in a crowded and demanding secondary curriculum timetable • troubleshooting advice for the teacher-turned-facilitator • a companion website containing useful links, downloadable resources and material to display on your interactive whiteboard. Edited and collated by the UK's leading P4C organisation, this book introduces a rationale for using and adapting P4C in the secondary curriculum.

Continuity and Change - Dan Bloom 2011-08-08

Continuity and Change: Gestalt Therapy Now describes what is quite possibly the most unique and significant gestalt therapy organization in the world. There are, of course, many other associations of gestalt therapists, but many of them are either much smaller or qualitatively different because they attend

to certifying and regulating their members. The Association for the Advancement of Gestalt Therapy (AAGT) does not certify nor regulate; its sole purpose is to advance the theory and practice of gestalt therapy through the associating of its members. This book both highlights the nature of contemporary gestalt therapy and makes known the existence and nature of the AAGT through the lens of its tenth biennial conference, which was held in Philadelphia, Pennsylvania, USA. In 2010 the AAGT returned to the United States for a venue in its biennial conference after having been in Amsterdam in the Netherlands; Vancouver, Canada; and Manchester, England. It's regional growth had been sustained, and its international scope had become expansive. The 2010 conference, with its theme of continuity and change, was a look at contemporary gestalt therapy, and it also featured a significant and growing dialogue with recognized leaders in other clinical perspectives. The 2010 conference featured many long-time, recognized colleagues from the field of gestalt therapy, including many aging colleagues who trained personally with the founders of gestalt therapy. The conference proceedings were rich and varied. This book includes papers based on pre-conference workshops, and conference presentations and panels. Chapter contributors emerge from the structure of the conference itself, and they include many of the most compelling thinkers and practitioners in the world of contemporary gestalt therapy.

Raising Henry - Rachel Adams 2013-09-24

Rachel Adams's life had always gone according to plan. She had an adoring husband, a beautiful two-year-old son, a sunny Manhattan apartment, and a position as a tenured professor at Columbia University. Everything changed with the birth of her second child, Henry. Just minutes after he was born, doctors told her that Henry had Down syndrome, and she knew that her life would never be the same. In this honest, self-critical, and surprisingly funny book, Adams chronicles the first three years of Henry's life and her own transformative experience of unexpectedly becoming the mother of a disabled child. A highly personal story of one family's encounter with disability, "Raising Henry" is also an insightful exploration of today's knotty terrain of social prejudice, disability policy, genetics, prenatal testing, medical training, and inclusive education. Adams untangles the contradictions of living in a society that is more enlightened and supportive of people with disabilities than ever before, yet is racing to perfect prenatal tests to prevent children like Henry from being born. Her book is gripping, beautifully written, and nearly impossible to put down. Once read, her family's story is impossible to forget.

Seaborn - Chris Howard 2008

Aleximor, a four-hundred-year-old sorcerer, wages war and seeks revenge against the entire Seaborn royal line and threatens to use Cassandra, the King of the Seaborn's granddaughter, and college student Corina Lairsey as pawns in his evil plot.

Twelve Years a Slave - Solomon Northup 2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Library Journal - 2005

The Complete Directory for People with Chronic Illness - Sedgwick Press 2005

This informative resource provides a comprehensive overview of the support services and information resources available for people diagnosed with a chronic illness. Thousands of hours of research have gone into this 2005/06 edition, hundreds of new entries have been added and thousands of enhancements have been made to existing entries. This widely-hailed directory is structured around the 90 most prevalent chronic illnesses - from Asthma to Cancer to Wilson's Disease - and provides a comprehensive overview of the support services and information resources available for people diagnosed with a chronic illness. Each chronic illness has its own chapter and contains a brief description in layman's language, followed by important resources for National & Local Organizations, State Agencies, Newsletters, Books & Periodicals, Libraries & Research Centers, Support Groups & Hotlines, Web Sites and much more. Two indexes provide quick access to this wealth of information: Entry Index and Geographic Index. This directory is an important resource for health care professionals, the collections of hospital and health care libraries, as well as an invaluable tool for people with a chronic illness and their support network.

Contemporary Authors - Lisa Kumar 2004-07

A biographical and bibliographical guide to current writers in all fields including poetry, fiction and nonfiction, journalism, drama, television and movies. Information is provided by the authors themselves or drawn from published interviews, feature stories, book reviews and other materials provided by the authors/publishers.

Twilight of the Anthropocene Idols - Claire Colebrook 2020-10-09

Following on from *Theory and the Disappearing Future*, Cohen, Colebrook and Miller turn their attention to the eco-critical and environmental humanities' newest and most fashionable of concepts, the Anthropocene. The question that has escaped focus, as "tipping points" are acknowledged as passed, is how language, mnemo-technologies, and the epistemology of tropes appear to guide the accelerating ecocide, and how that implies a mutation within reading itself-from the era of extinction events. Only in this moment of seeming finality, the authors argue, does there arise an opportunity to be done with mourning and begin reading. Drawing freely on Paul de Man's theory of reading, anthropomorphism and the sublime, *Twilight of the Anthropocene Idols* argues for a mode of critical activism liberated from all-too-human joys and anxieties regarding the future. It was quite a few decades ago (1983) that Jurgen Habermas declared that 'master thinkers had fallen on hard times.' His pronouncement of hard times was premature. For master thinkers it is the best of times. Not only is the world, supposedly, falling into a complete absence of care, thought and frugality, a few hyper-masters have emerged to tell us that these hard times should be the best of times. It is precisely because we face the end that we should embrace our power to geo-engineer, stage the revolution, return to profound thinking, reinvent the subject, and recognize ourselves fully as one global humanity. Enter anthropos. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Library Journal - Melvil Dewey 2005

Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

The Journey from the Center to the Page - Jeff Davis 2008-04-01

Jeff Davis artfully illustrates how yoga philosophies and practices can be an invaluable ally to the writing life.

[Journey Among Animals](#) - Meredith Happold 2021-08-25

Journey among Animals is zoologist Meredith Happold's delightful and enlightening story of her work with animals - especially bats. It begins with the story of Mickey the mouse-eared bat who taught her to love bats, and her childhood in rural Australia surrounded by goats, horses, dogs and possums who taught her how to establish empathy with animals. Meredith studied zoology at university, going on to become a highly regarded zoologist specializing in animal behaviour and ecology. *Journey among Animals* explores some of her field career in Nigeria and Malawi where she and her husband studied the ecology and behaviour of small mammals and bats in many different habitats. Their research culminated in having an African bat named after them (Happolds' Pipistrelle, *Parahypsugo happoldorum*) in recognition of their work. Bats are much-maligned animals, but Meredith demonstrates how these delightful, intelligent, friendly, curious,

useful creatures are so important in today's world and *Journey among Animals* are Meredith's reflections on how attitudes to animals and the study of animal behaviour have changed during her lifetime.

Stories of Illness and Healing - Sayantani DasGupta 2007

A collection of women's illness narratives *Stories of Illness and Healing* is the first collection to place the voices of women experiencing illness alongside analytical writing from prominent scholars in the field of narrative medicine. The collection includes a variety of women's illness narratives--poetry, essays, short fiction, short drama, analyses, and transcribed oral testimonies--as well as traditional analytic essays about themes and issues raised by the narratives. *Stories of Illness and Healing* bridges the artificial divide between women's lives and scholarship in gender, health, and medicine. The authors of these narratives are diverse in age, ethnicity, family situation, sexual orientation, and economic status. They are doctors, patients, spouses, mothers, daughters, activists, writers, educators, and performers. The narratives serve to acknowledge that women's illness experiences are more than their diseases, that they encompass their entire lives. The pages of this book echo with personal accounts of illness, diagnosis, and treatment. They reflect the social constructions of women's bodies, their experiences of sexuality and reproduction, and their roles as professional and family caregivers. Finally, and perhaps most importantly, *Stories of Illness and Healing* draws the connection between women's suffering and advocacy for women's lives.

Ranger Handbook (Large Format Edition) - Ranger Training Brigade 2016-02-12

The history of the American Ranger is a long and colorful saga of courage, daring, and outstanding leadership. It is a story of men whose skills in the art of fighting have seldom been surpassed. The United States Army Rangers are an elite military formation that has existed, in some form or another, since the American Revolution. A group of highly-trained and well-organized soldiers, US Army Rangers must be prepared to handle any number of dangerous, life-threatening situations at a moment's notice-and they must do so calmly and decisively. This is their handbook. Packed with down-to-earth, practical information, *The Ranger Handbook* contains chapters on Ranger leadership, battle drills, survival, and first aid, as well as sections on military mountaineering, aviation, waterborne missions, demolition, reconnaissance and communications. If you want to be prepared for anything, this is the book for you. Readers interested in related titles from The U.S. Army will also want to see: *Army Guerrilla Warfare Handbook* (ISBN: 9781626542730) *Army Guide to Boobytraps* (ISBN: 9781626544703) *Army Improvised Munitions Handbook* (ISBN: 9781626542679) *Army Leadership Field Manual FM 22-100* (ISBN: 9781626544291) *Army M-1 Garand Technical Manual* (ISBN: 9781626543300) *Army Physical Readiness Training with Change FM 7-22* (ISBN: 9781626544017) *Army Special Forces Guide to Unconventional Warfare* (ISBN: 9781626542709) *Army Survival Manual FM 21-76* (ISBN: 9781626544413) *Army/Marine Corps Counterinsurgency Field Manual* (ISBN: 9781626544246) *Map Reading and Land Navigation FM 3-25.26* (ISBN: 9781626542983) *Rigging Techniques, Procedures, and Applications FM 5-125* (ISBN: 9781626544338) *Special Forces Sniper Training and Employment FM 3-05.222* (ISBN: 9781626544482) *The Infantry Rifle Platoon and Squad FM 3-21.8 / 7-8* (ISBN: 9781626544277) *Understanding Rigging* (ISBN: 9781626544673)

The Jeffrey Journey - 2010 Edition - Helen Baldwin 2010-02-27

Revised and Updated - 2010 with new resources and dedications. In May, 1997, Randy and Helen Baldwin eagerly welcomed their third child, Jeffrey, as did his older siblings, Matthew and Katie. Jeffrey's arrival, unplanned but greatly anticipated, sparked a few adjustments in this family long removed from diaper duty, but Jeffrey was obviously a special gift. Eight weeks later, life took a completely unexpected downward spiral into the depths of despair when Jeffrey was diagnosed with Spinal Muscular Atrophy (SMA), a rare, progressive genetic neuromuscular disease with deadly ramifications. The neurologist handed over the utterly devastating news that Jeffrey had a severe case of the most destructive form without a morsel of hope that anything could be done to thwart the effects of the killer disease. Faced with the nightmare that their baby was expected to die within two years and that there was no treatment or cure, Randy and Helen took their faith in God to a higher level and embarked on a quest to defy SMA and its stranglehold on their precious baby's life. They sought the expertise of alternative practitioners and relentlessly relied on prayers for Jeffrey's health and for strength, courage, and wisdom for themselves and their family. *The Jeffrey Journey* is the story of how one family - with friends and family, prayer, and God's grace - rose to the challenge of caring for a dying child as they also realized the countless blessings left by their angel.

The Crustacean Nervous System - Konrad Wiese 2013-04-17

Crustacean preparations have been successfully used for more than 50 years to investigate the principles which enable nerve cells and neural circuitry to perform in a wide variety of functions. The proud record of information of general significance obtained from crayfish and lobster nervous systems testifies that the use of an experimental system precisely matching theoretical and experimental requirements of a measurement is an essential part of the success. In some respects, the secondarily diversified vertebrate and mammalian nervous systems pose severe obstacles to experimentation and measurement, whereas the crustacean nervous system recommends itself by being composed of individual neurons of unique morphology and physiology, which can be used repeatedly in several preparations. Moreover, a restricted number of invariantly displayed behaviors enable the experimenter to correlate neuron activity with parts of the behavior easier. Experts use these advantages to focus on a well-defined neuron and mechanism and to take a convincing measurement within a minimum amount of time. In this book distinguished neurobiologists, the leading experts in the field, have joined efforts to present research using crustacean experimental systems. Thus they have contributed comprehensive information regarding a nervous system other than that of vertebrates and mammals, that of crustaceans. The accumulated knowledge on the crustacean nervous system shows that it is clearly divergent in evolution but functions in a similar way to neuronal circuitry found in the vertebrate system and can be used to interpret it.

Talking with Patients About the Personal Impact of Illness - Leonore Buckley 2018-04-19

This book explores the psychosocial impact of serious illness - its effect on a person's identity and relationships - and the doctor's role in counseling patients. Even the most seasoned physician often feels inadequate when it comes to discussing the personal impact of disability and serious illness with patients. It takes time, attention, and skill. Most physicians who are good at this learn what to say from observations of physicians they respect and the conversations they share with patients over many years of practice. Like everything else in medicine, there is a continuous learning curve. This book offers a beginning. It includes first-hand experiences and reflections on serious illness by physicians and patients, concrete advice on how to initiate discussions of difficult psychosocial issues, topics for organizing discussion, suggested readings, and guides for patient interviews. Much is written about patient-centered care and the patient experience. What sets this book apart is, first, Leonore Buckley's ability to tell stories about her own medical experience. These teaching tales give young physicians a sense of the task that their profession requires of them, while keeping that task within human proportions. Second and complementing that is her excellent compilation of quotations and stories from the memoirs of patients and physicians, especially physicians as patients. I hope this empathic, useful collection of materials for teaching and reflection finds its way into medical school curricula, and I hope it is one of those books that physicians return to during years of practice, especially when they sense that the treatment expert is crowding the witness out of the room. Patients need both doctors. Leonore Buckley shows how doctors are able to expect nothing less of themselves' - Arthur W Frank in the Foreword.

Forthcoming Books - Rose Arny 2004

Magill's Medical Guide - Anne Chang 2008

Covers diseases, disorders, treatments, procedures, specialties, anatomy, biology, and issues in an A-Z format, with sidebars addressing recent developments in medicine and concise information boxes for all diseases and disorders.

Remembering the Space Age - Steven J. Dick 2008

From the Publisher: Proceedings of October 2007 conference, sponsored by the NASA History Division and the National Air and Space Museum, to commemorate the 50th anniversary of the Sputnik 1 launch in October 1957 and the dawn of the space age.

The Theory of Experiential Education - Richard J. Kraft 1985

Steps to Writing Well - Jean Wyrick 2001-10-01

The informal, student-friendly tone of these rhetorically-organized rhetoric/reader/handbooks provides step-by-step instructions on writing a variety of 500-800-word essays.

Use Your Words - Kate Hopper 2012-04-02

USE YOUR WORDS introduces the art of creative nonfiction to women who want to give written expression to their lives as mothers. Written by award-winning teacher and writer, Kate Hopper, this book will help women find the heart of their writing, learn to use motherhood as a lens through which to write the world, and turn their motherhood stories into art. Each chapter of USE YOUR WORDS focuses on an element of craft and contains a lecture, a published essay, and writing exercises that will serve as jumping-off points for the readers' own writing. Chapter topics include: the importance of using concrete details, an overview of creative nonfiction as a genre, character development, voice, humor, tense and writing the "hard stuff," reflection and back-story, structure, revision, and publishing. The content of each lecture is aligned with the essay/poem in that chapter to help readers more easily grasp the elements of craft being discussed. Together the chapters provide a unique opportunity for mother writers to learn and grow as writers. USE YOUR WORDS takes the approach that creative writing can be taught, and this underscores each chapter. When students learn to read like writers, to notice how a piece is put together, and to question the choices a writer makes, they begin to think like writers. When they learn to ground their writing in concrete, sensory details and begin to understand how to create believable characters and realistic dialogue, their own writing improves. USE YOUR WORDS reflects Kate's style as a teacher, guiding the reader in a straightforward, nurturing, and passionate voice. As one student noted in a class evaluation: "Kate is a born writer and teacher, and her enthusiasm for essays about motherhood and for teaching the nuts and bolts of writing so that ordinary mothers have the tools to write their stories is a gift to the world. She is raising the value of motherhood in our society as she helps mothers build their confidence and strengthen their game as writers."

Experiential Learning - John P. Wilson 2013-08-03

Experiential Learning enables educators, trainers, coaches and facilitators to unleash some of the more potent ingredients of learning through experience. It presents a simple model: the Learning Combination Lock, which illustrates the wide range of factors that can be altered to enhance the learning experience. The theory is brought to life with hundreds of examples from around the world and covers issues such as: experience and intelligence; facilitation, good practice and ethics; learning environments; experiential learning activities; and working with the senses and emotions. Experiential Learning offers the skills that can be successfully applied to a variety of settings including management education, corporate training, team-building, youth-development work, counselling and therapy, schools and higher education and special needs training. This fully updated third edition includes guidance for coaches, cutting edge new material on sensory intelligence and updated models, tools and case studies throughout. Online supporting resources include 'Introduction to Sensory Intelligence' audio files.

Love and Living - Thomas Merton 2002-11

A selection of Merton's writings, the burden of which is the necessity of learning to live and to love, emphasizes the unending process of learning, modern man's fear of solitude, and humanity's place in nature

The Austronesian Languages - R. A. Blust 2009

The Gale Encyclopedia of Neurological Disorders - Stacey L. Chamberlin 2005

Contains nearly four hundred alphabetized full-length articles on neurological disorders and drugs and treatments for neurological disorders, and includes further reading lists.

Drawing Down the Moon - Margot Adler 2006-10-03

The essential text and classic study of Neo-Paganism Since its original publication, *Drawing Down the Moon* continues to be the only detailed history of the burgeoning but still widely misunderstood Neo-Pagan subculture. Margot Adler attended ritual gatherings and interviewed a diverse, colorful gallery of people across the United States, people who find inspiration in ancient deities, nature, myth, even science fiction. In this edition, featuring an updated resource guide of newsletters, journals, books, groups, and festivals, Margot Adler takes a fascinating and honest look at the religious experiences, beliefs, and lifestyles of modern America's Pagan groups.

The Collected Poems of Thomas Merton - Thomas Merton 1977

"With the [publication of this book], an ever-wider audience may more fully appreciate the ... range of the poet's technique, the scope of his concerns, and the humaneness of his vision"--Back cover.

The Complete Directory for People with Disabilities - Sedgwick Press 2006

AI - Margaret A. Boden 2016-05-19

The applications of Artificial Intelligence lie all around us; in our homes, schools and offices, in our cinemas, in art galleries and - not least - on the Internet. The results of Artificial Intelligence have been invaluable to biologists, psychologists, and linguists in helping to understand the processes of memory, learning, and language from a fresh angle. As a concept, Artificial Intelligence has fuelled and sharpened the philosophical debates concerning the nature of the mind, intelligence, and the uniqueness of human beings. Margaret A. Boden reviews the philosophical and technological challenges raised by Artificial Intelligence, considering whether programs could ever be really intelligent, creative or even conscious, and shows how the pursuit of Artificial Intelligence has helped us to appreciate how human and animal minds are possible.

Muscular Dystrophy - Clay Farris Naff 2011-12-01

There are 8 different known types of this disorder, and some Muscular Dystrophy can actually be discovered during pregnancy, according to HRF. This guidebook provides essential information on MD, but also serves as a historical survey, by providing information on the controversies surrounding its causes, and first-person narratives by people coping with MD. Patients, family members, or caregivers explain the condition from their own experience. The symptoms, causes, and treatments are explained in detail. Essential to anyone trying to learn about diseases and conditions, the alternative treatments are explored. Each essay is carefully edited and presented with an introduction, so that they are accessible for student researchers and readers.

Brief Reference of Student Disabilities - Lee Brattland Nielsen 2008-08-27

This updated edition provides information about common exceptionalities, ADHD and bipolar disorder, legal considerations, and discussions on postsecondary transition, NCLB, and the reauthorization of IDEA 2004.

Moonrise - Penny Wolfson 2014-04-22

Moonrise is Penny Wolfson's first-person account of her family, her son Ansel, and his progressive disability, caused by the genetic disease Duchenne muscular dystrophy. The journey begins when he is born and deemed a particularly beautiful and magical baby, continues with the alarming possibility, at the age of two, of "wrongness," takes us through the diagnosis of disease and prognosis of early death, and brings us to his adolescence, where his parents are never sure if the moon is rising or setting over his life. As she traces her son's development and the impact of his disability on her worldview, she embarks on a quest to understand scientific advances and their implications. (The gene was isolated at approximately the time Ansel was diagnosed.) She also explores special education, giftedness, prenatal testing, and the genetic links she shares with her mother, sisters, and son. Questions about the disease-causing mutation persist: What does knowledge of the self on a molecular level mean? Is genetic self-knowledge our goal now, much as knowledge of the psyche was in the last century? Moonrise is an essential contribution to the dialogue about genetics, as well as a deeply human story about a remarkable child and his family.

Book Review Index - 2004

Every 3rd issue is a quarterly cumulation.

Paul Klee and His Illness - H. Suter 2010-02-01

In 1933 Paul Klee's work was branded as 'Entartete Kunst' (Degenerate Art) by the National Socialists and he was dismissed from his professorial post at the Düsseldorf Academy of Fine Arts. This led him, together

with his wife Lily, to return to his 'real home' of Bern. Here his avant-garde art was not understood and Klee found himself in unasked for isolation. In 1935 Klee started to suffer from a mysterious disease. The symptoms included changes to the skin and problems with the internal organs. In 1940 Paul Klee died, but it was only 10 years after his death that the illness was actually given the name 'scleroderma' in a publication about Klee. However, the diagnosis remained mere conjecture. Since his adolescence, the dermatologist and venereologist Dr. Hans Suter has been fascinated by Paul Klee and his art, and more than 30 years ago this fascination spurred him to commence research into the illness and its influence on the art of Paul Klee's final years. It was due to Dr. Suter's meticulous investigations that Klee's illness could be defined as 'diffuse systemic sclerosis'. In this book the author assembles his findings and describes the rare and complex disease in a clear and comprehensible way. Further, he empathetically interprets more than 90 of Klee's late works. The point of view of a dermatologist renders a unique source of information. It provides, on one hand, new insights into everyday medical practices at the University of Bern in the 1930s, which will fascinate doctors and local historians alike. While, on the other hand, art historians and art lovers will be absorbed by the newly discovered links between Paul Klee's work and his illness.

US Army Survival Manual: FM 21-76 - United States Department of Defense 2016-04-27

This survival manual is organized as follows: Chapter 1. Introduction Survival Actions Pattern for Survival Chapter 2. Psychology of Survival A Look at Stress Natural Reactions Preparing Yourself Chapter 3. Survival Planning and Survival Kits Importance of Planning Survival Kits Chapter 4.
