Newton's Chicken: Science In The Kitchen - Massimiano Bucchi 2020-11-18

A highly rigorous, yet original and entertaining book that explores the connection between food and science. Why has science forcefully entered the kitchen from a certain moment in history? Why do scientists often use images and metaphors drawn from gastronomy? What is the common thread that connects scientific experiments to mouth-watering recipes? What has futurist cooking got in common with molecular gastronomy? Experiments with coffee, controversies over beer and chocolate recipes guarded as if they were secret patents are the ingredients of this original, surprising account of the intersections between gastronomy and research, between laboratories and kitchens.

Enoch Soames - Max Beerbohm 2016-09-01
"its retreat. He was an odd-looking person; but in the nineties odd apparitions were more frequent, I think, than they are now. The young writers of that era-and I was sure this man was a writer-strove earnestly to be distinct in aspect. This man had striven unsuccessfully. He wore a soft black hat of clerical kind, but of Bohemian intention, and a gray waterproof cape which, perhaps because it was waterproof, failed to be romantic. I decided that "dim" was the mot juste for him. I had already essayed to write, and was immensely keen on the mot juste, that Holy Grail of the period. The dim man was now again approaching our table, and this time he made up

his mind to pause in front of it. "You don't remember me," he said in a toneless voice. Rothenstein brightly focused him. "Yes, I do," he replied after a moment, with pride rather than effusion-pride in a retentive memory. "Edwin Soames." "Enoch Soames," said Enoch. "Enoch Soames," repeated Rothenstein in a tone implying that it was enough to have hit on the surname. "We met in Paris a few times when you [...]"

Tradiciones Peruanas - Ricardo Palma 1993

By Night in Chile - Roberto Bolaño 2003-12-17

In a deathbed confession, Father Urrutia, a Jesual priest and conservative literary critic, shares his memories of his work with agents of Opus Dei and his secret job of instructing Pinochet about Marxism to the Chilean junta generals can understand their enemy. Original. *A Long Saturday* - George Steiner 2017-03-08
George Steiner, born in 1929, is one of the preeminent intellectuals of his generation. Reading in many languages, celebrating the survival of high culture in the face of twentieth-century barbarisms, Steiner has probed the ethics of language and literature with an elegance and authority unmatched by any living critic. "A Long Saturday" is a series of conversations between Steiner and the French journalist Laure Adler. It addresses questions that have absorbed Steiner over his career, but in a more personal register than he has offered

before. Adler draws out Steiner on his boyhood in Vienna and Paris before the war, on his education at Chicago and Harvard, and on his early academic career. Books are a touchstone throughout, of course, but Steiner and Adler's conversation ranges also over music, chess, psychoanalysis, the place of Israel in Jewish life, and much more. Revealing and exhilarating by turns, this book invites all readers to pull up a chair and listen in on the conversation of a master. "

Recursos naturales, medio ambiente y sostenibilidad - United Nations 2019-10-14
La producción intelectual de la CEPAL en sus 70 años de existencia ha sido vasta en distintos ámbitos del desarrollo. En este libro se analizan y contextualizan los principales hitos e ideas del pensamiento económico de la CEPAL sobre recursos naturales, medio ambiente y sostenibilidad, organizados en las dos grandes etapas que han caracterizado la vida institucional: la estructuralista (1948-1990) y la neoestructuralista (de 1990 en adelante). A partir de una revisión sistemática de la literatura, se destacan ideas como el vínculo entre la especialización productiva en recursos naturales y los términos de intercambio desfavorables, formulada en los años cincuenta; la soberanía sobre los recursos naturales, en los sesenta; la enunciación temprana del principio de responsabilidades comunes pero diferenciadas, en los setenta; los estilos de desarrollo y medio ambiente, en los ochenta; la competitividad espuria, en los noventa, y la gobernanza de los recursos naturales, el estilo de desarrollo sostenible con igualdad y el gran impulso ambiental, en las dos primeras décadas del siglo XXI. El pensamiento neoestructuralista de la CEPAL es dinámico, abierto y se renueva permanentemente sin perder su tradición estructuralista. El libro aporta también elementos conceptuales para formular un

neoestructuralismo ecológico.

Women, Culture, and Politics in Latin America - Seminar on Feminism & Culture in Latin America 1992-02-25

The result of a collaboration among eight women scholars, this collection examines the history of women's participation in literary, journalistic, educational, and political activity in Latin American history, with special attention to the first half of this century.

The Social Documentary in Latin America - Julianne Burton 1990-09-15

Twenty essays by major filmmakers and critics provide the first survey of the evolution of documentary film in Latin America. While acknowledging the political and historical weight of the documentary, the contributors are also concerned with the aesthetic dimensions of the medium and how Latin American practitioners have defined the boundaries of the form.

Memory of Fire - Eduardo Galeano 1989

Diet, Nutrition, and the Prevention of Chronic Diseases - World Health Organization 2003-04-22

Trends such as shifting dietary patterns and an increasingly sedentary lifestyle combined with smoking and alcohol consumption are major risk factors for noncommunicable chronic diseases such as obesity, diabetes, cardiovascular diseases such as hypertension and stroke, cancer dental diseases and osteoporosis. This report reviews the scientific evidence on the effects of diet, nutrition and physical activity on chronic diseases and makes recommendations for public health policies and programmes. Issues considered include the macro-economic implications of public health on agriculture and the global supply and demand for fresh and processed foods.

Foodscares, Foodfields, and Identities in Yucatán - Steffan Igor Ayora Díaz 2012

The travel experience filled with personal trauma; the pilgrimages through a war-torn place; the journey with those suffering: these represent the darker sides of travel. This book explores the writings and texts of dark journeys and travels. In traveling over the dead, amongst the dying, and alongside the suffering, the authors give us a tour of humanity's violence and misery. From this dark side, there comes great beauty and poignancy in the characterization of flight; creativity in the comic, graphic, and graffiti sketches and comments on life; and the sense of profound and spiritual journeys being undertaken, recorded, and memorialized.

The Broken Spears - Miguel León Portilla 1969

Sustainable Poetry - Leonard M. Scigaj
2021-12-15

Focusing on the work of A.R. Ammons, Wendell Berry, W.S. Merwin, and Gary Snyder, author Leonard Scigaj shows that just as a sustainable society does not depreciate its resource base, so a sustainable poetry does not restrict interest to language. Over the past thirty years many poets have shown an increasing sensitivity to ecological thinking. But critics trained in poststructuralist language theory often fail to explore the substance of ecopoetry. Scigaj is the first to define ecopoetry as separate and distinct from nature or environmental poetry, marked by its concern with balancing the interests of human beings with the needs of nature. Just as science learned that the earth was not the center of the universe, ecopoetry insists on the recognition that humans are not at the center of the natural world.

Twelve Years a Slave - Solomon Northup
2021-01-01

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Cronopios and Famas - Julio Cortázar 1999

This volume presents an integrated epidemiologic, social, and economic analysis of the global epidemics of HIV among sex workers in low- and middle-income countries. The book provides a comprehensive review and synthesis of the available public health and social science data to characterize the nature, scope, and complexities of these epidemics. A community empowerment-based approach to HIV prevention, treatment, and care is outlined and demonstrated to be cost-effective across multiple settings, with a significant projected impact on HIV incidence among sex workers and transmission dynamics overall. The *Global HIV Epidemics among Sex Workers* seeks to assist governments, public health implementing agencies, donors, and sex worker communities to better understand and respond to the epidemics among a population facing heightened social and structural vulnerabilities to HIV. The book combines a systematic review of the global

epidemiology of HIV among sex workers and in-depth case studies of the epidemiology, policy and programmatic responses and surrounding social contexts for HIV prevention, care and treatment in eight countries. The authors employ mathematical modeling and cost-effectiveness analysis to assess the potential country-level impact of a community empowerment-based approach to HIV prevention, treatment, and care among sex workers when taken to scale in four countries representing diverse sociopolitical contexts and HIV epidemics: Brazil, Kenya, Thailand, and Ukraine. In each setting, greater investment in prevention, treatment, and care for sex workers is shown to significantly reduce HIV. Together these findings underline the urgency of further global investment in comprehensive, human rights-based responses to HIV among sex workers.

The Nose and Other Stories - Nikolai Gogol
2020-09-01

Nikolai Gogol's novel *Dead Souls* and play *The Government Inspector* revolutionized Russian literature and continue to entertain generations of readers around the world. Yet Gogol's peculiar genius comes through most powerfully in his short stories. By turns—or at once—funny, terrifying, and profound, the tales collected in *The Nose and Other Stories* are among the greatest achievements of world literature. These stories showcase Gogol's vivid, haunting imagination: an encounter with evil in a darkened church, a downtrodden clerk who dreams only of a new overcoat, a nose that falls off a face and reappears around town on its own, outranking its former owner. Written between 1831 and 1842, they span the colorful setting of rural Ukraine to the unforgiving urban landscape of St. Petersburg to the ancient labyrinth of Rome. Yet they share Gogol's characteristic obsessions—city crowds, bureaucratic hierarchy and irrationality, the devil in disguise—and a constant undercurrent of the absurd. Susanne Fusso's translations pay careful attention to the strangeness and wonder of Gogol's style, preserving the inimitable humor and oddity of his language. *The Nose and Other Stories* reveals why Russian writers from Dostoevsky to Nabokov have returned to Gogol as the cornerstone of their unparalleled literary tradition.

Global Education Monitoring Report 2020 - UNESCO 2020-07-07

This publication assesses progress towards Sustainable Development Goal 4 (SDG 4) on education and its ten targets, as well as other related education targets in the SDG agenda. It addresses inclusion in education, drawing attention to all those excluded from education, because of background or ability. The report is motivated by the explicit reference to inclusion in the 2015 Incheon Declaration, and the call to ensure an inclusive and equitable quality education in the formulation of SDG 4, the global goal for education. It reminds us that, no matter what argument may be built to the contrary, we have a moral imperative to ensure every child has a right to an appropriate education of high quality.

The Underdevelopment of Development - Andre Gunder Frank 1991-01-01

Taking stock of political and economic development in the world today, this book re-examines development in an era of rapid social change, and reflects the work of an intellectual giant, Andre Gunder Frank. Gunder Frank deconstructed conventional development economics and modernization theory, creating dependency theory. Today dependency theory has been replaced by world systems analysis - the view that national and regional economic (and political) development cannot be seen in isolation; states are part of a global economy that, in a sense, dictates and limits action. This is an excellent synthesizing volume on the state of development studies. Although a great part of its purpose is to pay tribute to its intellectual fat

The Mexican Revolution - Alan Knight 1990

This comprehensive two-volume history of the Mexican Revolution presents a new

interpretation of one of the world's most important revolutions. While it reflects the many facets of this complex and far-reaching historical subject it emphasises its fundamentally local, popular and agrarian character and locates it within a more general comparative context.-- Publisher.

Family Therapy - Maurizio Andolfi 2012-12-06
Dr. Maurizio Andolfi, "Andi" to my dog and me, is one of the fourth generation family therapy theorists. This book, which he calls "interactional," is probably one you would not enjoy. Maybe you could give it to a rival colleague on his birthday. Combining the teachings of Zwerling and Laperriere with Ferber is confusing. Add to that a Horney analysis and stir with two ounces of Minuchin and a dram of Haley, and Andolfi becomes distracting to his friends and colleagues. His work with Can crini reacculturated him somewhat, but a Roman is a Roman, and, of course, he could not understand such problems as those we conquer in the United States. Assuming your rival is a well-trained, cause-and-effect thinker, you might find ways to watch him squirm. If he has not tried paradoxical methods, expect him to take a long vacation from work. If he is already a good family therapist, he may become a bit hypomanic, and his team may talk to you in private. Encourage them to suggest that he work harder and stop reading the book or, better still, donate it to the social work school library; they will read anything. If the team complains that the book advises teaching sick families how to be their own therapists, resist any impulse to check this out. No family could become self-reparative when it is already dysfunctional. We know that professional help is the only hope.
America's First Cuisines - Sophie D. Coe 2015-08-12

After long weeks of boring, perhaps spoiled sea rations, one of the first things Spaniards sought in the New World was undoubtedly fresh food. Probably they found the local cuisine strange at first, but soon they were sending American plants and animals around the world, eventually enriching the cuisine of many cultures. Drawing on original accounts by Europeans and native Americans, this pioneering work offers the first detailed description of the cuisines of the Aztecs, the Maya, and the Inca. Sophie Coe begins with

the basic foodstuffs, including maize, potatoes, beans, peanuts, squash, avocados, tomatoes, chocolate, and chiles, and explores their early history and domestication. She then describes how these foods were prepared, served, and preserved, giving many insights into the cultural and ritual practices that surrounded eating in these cultures. Coe also points out the similarities and differences among the three cuisines and compares them to Spanish cooking of the period, which, as she usefully reminds us, would seem as foreign to our tastes as the American foods seemed to theirs. Written in easily digested prose, *America's First Cuisines* will appeal to food enthusiasts as well as scholars.

Celiac Disease and Non-Celiac Gluten Sensitivity - Luis Rodrigo 2014-11-07

Celiac disease is a systemic autoimmune process and appears in genetically predisposed individuals, with a well-known cause, consisting in a permanent intolerance to gluten, a protein contained in the flour of wheat, rye, barley and oats. Worldwide celiac disease affects to 1% of the Caucasian and there is recent evidence that the disease is increasing in USA and Finland among other regions in the world. It is considered to be the most prevalent disease with a genetic predisposition. The clinical forms of presentation are varied. The classical form consisting of diarrhea, anemia and failure to thrive is still common in children, but in the adult patients the symptoms resemble the irritable bowel syndrome. Mono-symptomatic forms with extra-intestinal manifestations are frequent. Hematological, cutaneous, articular, hepatic, bone and neurological manifestations are often described. This protean presentation and the lack of awareness explain the delay in diagnosis and suggest that screening in high-risk groups is indicated. The publication of this book written mainly by Spanish and Latin-American clinicians, researchers, and teachers, demonstrates the wide interest and the involvement of different disciplines that are necessary to understand celiac disease and gluten-related pathologies, such as non-celiac gluten-sensitivity. This has a great impact in the general public and in the industry. However, the knowledge of non-celiac gluten-related pathologies remains scarce but presently in the

process of being properly defined. This book also highlights the importance of recognizing non-celiac gluten-sensitivity and briefly discusses a new definition. It also provides some perspectives to take into account when studying celiac disease in China and Central America. It describes new observations in Mexico, El Salvador and Costa Rica. The psychosocial impact as studied and reported by Argentinean investigators also adds to the value of this book. Written with a multidisciplinary team, we think that this book could be of interest to a great variety of medical specialists. Due to the systemic nature and variable presentation of celiac disease it certainly is of interest to pediatricians, gastroenterologists, hepatologists, specialists in internal medicine, general practitioners as well as hematologists, immunologists, geneticists, pathologists, rheumatologists, dermatologists, neurologists, gynecologists, neurologists, psychiatrists, psychologists, orthopedic surgeons, specialists in rehabilitation medicine, endocrinologists. Being gluten the cause of these disorders, the food industry, dietitians and nutritionists will benefit from the valuable information presented in this book.

A Madman's Manuscript - Charles Dickens
2020-08-26

"It is a grand thing to be mad" A rich, self-confessed madman meets a poor girl and, wishing to marry her, he puts on a "normal" persona and a fake smile. The girl's family pushes her into his arms, but when the madman finds out that she is in love with someone else his true colours start to show. Similar to *Joker* (2019) starring Joaquin Phoenix, *A Madman's Manuscript* gives us an understanding of the inner workings of a seriously delusional and mentally ill person. Unnerving but very

fascinating. Charles Dickens (1812-1870) was an English author, social critic, and philanthropist. Much of his writing first appeared in small instalments in magazines and was widely popular. Among his most famous novels are *Oliver Twist* (1839), *David Copperfield* (1850), and *Great Expectations* (1861).

Frida - Hayden Herrera 2018-06-28

The beautifully illustrated and utterly absorbing biography of one of the twentieth century's most transfixing artists *Frida* is the story of one of the twentieth century 's most extraordinary women, the painter Frida Kahlo. Born near Mexico City, she grew up during the turbulent days of the Mexican Revolution and, at eighteen, was the victim of an accident that left her crippled and unable to bear children. To salvage what she could from her unhappy situation, Kahlo had to learn to keep still so she began to paint. Kahlo 's unique talent was to make her one of the century 's most enduring artists. But her remarkable paintings were only one element of a rich and dramatic life. *Frida* is also the story of her tempestuous marriage to the muralist Diego Rivera, her love affairs with numerous, diverse men such as Isamu Noguchi and Leon Trotsky, her involvement with the Communist Party, her absorption in Mexican folklore and culture, and of the inspiration behind her unforgettable art.

The Age Of Extremes - Eric Hobsbawm
2020-02-06

THE AGE OF EXTREMES is eminent historian Eric Hobsbawm's personal vision of the twentieth century. Remarkable in its scope, and breathtaking in its depth of knowledge, this immensely rewarding book reviews the uniquely destructive and creative nature of the troubled twentieth century and makes challenging predictions for the future.
