Essence and Alchemy - Mandy Aftel

2011-04-01

An artisan perfumer reveals a lost art and its mysterious, sensual history. For centuries, people have taken what seems to be an instinctive pleasure in rubbing scents into their skin. Perfume has helped them to pray, to heal, and to make love. And as long as there has been perfume, there have been perfumers, or rather the priests, shamans, and apothecaries who were their predecessors. Yet, in many ways, perfumery is a lost art, its creative and sensual possibilities eclipsed by the synthetic ingredients of which contemporary perfumes are composed, which have none of the subtlety and complexity of essences derived from natural substances, nor their lush histories. *Essence and Alchemy* resurrects the social and metaphysical legacy that is entwined with the evolution of perfumery, from the dramas of the spice trade to the quests of the alchemists to whom today's perfumers owe a philosophical as well as a practical debt. Mandy Aftel tracks scent through the boudoir and the bath and into the sanctums of worship, offering insights on the relationship of scent to sex, solitude, and the soul. Along the way, she imparts instruction in the art of perfume compositions, complete with recipes, guiding the reader in a process of transformation of materials that continues to follow the alchemical dictum *solve et coagula* (dissolve and combine) and is itself aesthetically and spiritually transforming.

Perfume - Patrick Suskind 2001-02-13

INTERNATIONAL BESTSELLER • Set in eighteenth-century France, the classic novel that provokes a terrifying examination of what happens when one man's indulgence in his

greatest passion—his sense of smell—leads to murder. In the slums of eighteenth-century France, the infant Jean-Baptiste Grenouille is born with one sublime gift—an absolute sense of smell. As a boy, he lives to decipher the odors of Paris, and apprentices himself to a prominent perfumer who teaches him the ancient art of mixing precious oils and herbs. But Grenouille's genius is such that he is not satisfied to stop there, and he becomes obsessed with capturing the smells of objects such as brass doorknobs and fresh-cut wood. Then one day he catches a hint of a scent that will drive him on an ever-more-terrifying quest to create the "ultimate perfume"—the scent of a beautiful young virgin. Told with dazzling narrative brilliance, *Perfume* is a hauntingly powerful tale of murder and sensual depravity. Translated from the German by John E. Woods.

Perfume: A Century of Scents - Lizzie Ostrom 2016-12-06

Signature scents and now-lost masterpieces; the visionaries who conceived them; the wild and wonderful campaigns that launched them; the women and men who wore them—every perfume has a tale to tell. Join Lizzie Ostrom on an olfactory adventure as she explores the trends and crazes that have shaped the way we've spritzed. One hundred perfumes and scents in all their fragrant glory reveal a fascinating social history of the past century. From the belle époque through the swinging sixties, to the naughty nineties and beyond, Ostrom brings intelligence and wit to this most ravishing of subjects. There was the patriotic impact of English Lavender during World War I and perfumes that captured the Egyptomania of the 1920s. Estée Lauder created "Youth Dew" and with it, distilled the essence of 1950's suburbia. Patchouli oil—the "anti-perfume" of the 1960s—was sure to keep money out of the hands of corporations and "the man." And who could forget the fervor created by the grunge androgyny of CK One? Scent is truly the passport to memory, making *Perfume* both a lush treat and an insightful examination of the twentieth century through the most mysterious of the five senses.

The Scent of Empires - Karl Schlögel
2021-04-27

Can a drop of perfume tell the story of the twentieth century? Can a smell bear the traces of history? What can we learn about the history of the twentieth century by examining the fate of perfumes? In this remarkable book, Karl Schlögel unravels the interconnected histories of two of the world's most celebrated perfumes. In tsarist Russia, two French perfumers - Ernest Beaux and Auguste Michel - developed related fragrances honouring Catherine the Great for the 300th anniversary of the Romanov dynasty. During the Russian Revolution and Civil War, Beaux fled Russia and took the formula for his perfume with him to France, where he sought to adapt it to his new French circumstances. He presented Coco Chanel with a series of ten fragrance samples in his laboratory and, after smelling each, she chose number five - the scent that would later go by the name Chanel No. 5. Meanwhile, as the perfume industry was being revived in Soviet Russia, Auguste Michel used his original fragrance to create Red Moscow for the tenth anniversary of the Revolution. Piecing together the intertwined histories of these two famous perfumes, which shared a common origin, Schlögel tells a surprising story of power,

intrigue and betrayal that offers an altogether unique perspective on the turbulent events and high politics of the twentieth century. This brilliant account of perfume and politics in twentieth-century Europe will be of interest to a wide general readership.

The Secret of Scent - Luca Turin 2007-10-23

One man's passion for perfume leads him to explore one of the most intriguing scientific mysteries: What makes one molecule smell of garlic while another smells of rose? In this witty, engrossing, and wildly original volume, author Luca Turin explores the two competing theories of smell. Is scent determined by molecular shape

or molecular vibrations? Turin describes in fascinating detail the science, the evidence, and the often contentious debate—from the beginnings of organic chemistry to the present day—and pays homage to the scientists who went before. With its uniquely accessible and captivating approach to science via art, *The Secret of Scent* will appeal to anyone who has ever wondered about the most mysterious of the five senses.

The Emperor of Scent - Chandler Burr

2004-02-10

The Emperor of Scent tells of the scientific maverick Luca Turin, a connoisseur and something of an aesthete who wrote a bestselling perfume guide and bandied about an outrageous new theory on the human sense of smell. Drawing on cutting-edge work in biology, chemistry, and physics, Turin used his obsession with perfume and his eerie gift for smell to turn the cloistered worlds of the smell business and science upside down, leading to a solution to the last great mystery of the senses: how the nose works.

The Complete Technology Book on Flavours, Fragrances and Perfumes - NPCS Board of

Consultants & Engineers 2007-10-01

Many studies have been carried out on fragrances, flavors and perfumes worldwide. These products have important commercial value not only in India but in all over the world. Perhaps the most interesting results of the last few years in the fragrance and flavour fields are the many compounds described in this book. They may be used to engender or augment flavours in foodstuffs, chewing gums and medicinal products like mouthwash and toothpaste. The same compounds or closely related ones serve also to produce desirable aromas for perfumes, perfumed compositions such as soaps, detergents and cosmetics etc. Perfume is a mixture of fragrant essential oils and/or aroma compounds, fixatives, and solvents used to give the human body, animals, objects, and living spaces a pleasant scent. The odoriferous compounds that make up a perfume can be manufactured synthetically or extracted from plant or animal sources. Perfumes have been known to exist in some of the earliest human civilizations either through ancient texts or from archaeological digs. Modern perfumery

began in the late 19th century with the commercial synthesis of aroma compounds, which allowed for the composition of perfumes with smells previously unattainable solely from natural aromatics alone. Flavors and Fragrances (F&F) are the essential ingredients that lend taste and smell, respectively, to food and personal or home care products. Without these, all the products that we use such as toffees, chips, toothpastes, soaps and shampoos, would be tasteless or odorless, boring, functional products. Fragrances are different types; floral, fruity, woody, flower, natural, etc. and has applications in different field; soap and toiletries, cosmetics, household applications etc. Flavoring in common language denote the combined chemical sensations of taste and smell, the same terms are usually used in the fragrance and flavors industry to refer to edible chemicals and extracts that alter the flavor of food and food products through the sense of smell. Applications of flavouring are in numerous field; meat, chocolate, dairy, beverage, confectionary, bakery, teas etc. Due to the high cost or unavailability of natural flavor extracts, most commercial flavorants are nature identical, which means that they are the chemical equivalent of natural flavors but chemically synthesized rather than being extracted from the source materials. Traditionally, while flavors and fragrances were viewed as the most customized of all raw materials, and therefore commanded higher prices, in the last decade, prices have been pushed down consistently by large manufacturers. This book basically deals with the roots and the evolution of perfumery, the part of hedonism, how perfumery is linked to the other fine arts, the art of composition, conclusion, introduction, fragrancing of functional products, line extensions, perfumery for household products, floral series : rose notes, jasmin notes, hyacinth notes, lilac and lily, orange blossom notes, tuberose notes, violet notes, mignonette, woody series: sandal notes, peppery notes, caryophyllaceous notes, introduction, aroma composition of various teas, flavory ceylon black tea, keemun black tea, green tea, pouchong tea and jasmine tea, lotus tea, soap manufacture, raw materials, shaving soap, transparent soaps, super fatted toilet soaps, the milling process, coloured soaps,

perfumes, soap compounds, acacia, almond, almond soap, amber soap, buttermilk, brown windsor, carnation, chypre, cologne, cyclamen, fougere, heliotrope, hyacinth, jasmin, lavender, lilac, lily, etc. This book contains formulae and processes of various types of flavours, fragrances and perfumes. New entrepreneurs, technocrats, research scholars can get good knowledge from this book.

The Case Against Fragrance - Kate Grenville
2017-01-30

Read The Case Against Fragrance and you will never think about fragrance in the same way again. If you have been suffering fragrance in silence, you will know you are not alone.' Conversation Kate Grenville had always associated perfume with elegance and beauty. Then the headaches started. Like perhaps a quarter of the population, Grenville reacts badly to the artificial fragrances around us: other people's perfumes, and all those scented cosmetics, cleaning products and air fresheners. On a book tour in 2015, dogged by ill health, she started wondering: what's in fragrance? Who tests it for safety? What does it do to people? The more Grenville investigated, the more she felt this was a story that should be told. The chemicals in fragrance can be linked not only to short-term problems like headaches and asthma, but to long-term ones like hormone disruption and cancer. Yet products can be released onto the market without testing. They're regulated only by the same people who make and sell them. And the ingredients don't even have to be named on the label. This book is based on careful research into the science of scent and the power of the fragrance industry. But, as you'd expect from an acclaimed novelist, it's also accessible and personal. The Case Against Fragrance will make you see—and smell—the world differently. When I was little, my mother had a tiny, precious bottle of perfume on her dressing-table and on special occasions she'd put a dab behind her ears. The smell of Arpege was always linked in my mind with excitement and pleasure—Mum with her hair done, wearing her best dress and her pearls, off for a night out with Dad. When I got old enough to have my own special occasions I also had my favourite perfume. I loved the bottles: those sensuous shapes. I loved the names and the labels, so

evocative of all things glamorous. Kate Grenville is one of Australia's most celebrated writers. Her bestselling novel *The Secret River* received the Commonwealth Writers' Prize, and was shortlisted for the Man Booker Prize and the Miles Franklin Literary Award. *The Idea of Perfection* won the Orange Prize. Grenville's other novels include *Sarah Thornhill*, *The Lieutenant*, *Lilian's Story*, *Dark Places* and *Joan Makes History*. Kate lives in Sydney and her most recent works are the non-fiction books *One Life: My Mother's Story* and *The Case Against Fragrance*. 'One spritz of aftershave or perfume can leave other people retching and clutching their heads—you never see that in the ads.' Kaz Cooke 'Beginning with her own physical reaction to fragrance that begins with a headache a lot of us know ourselves, she investigates the fragrance industry and its side-effects and interweaves these facts with the personal to create an accessible work of non-fiction.' ArtsHub 'Fact-dense and extensively referenced, the book is a delight to read and never gets bogged down...While some of the science has been simplified, the book generally conveys the sense of it correctly...Well developed and thoughtful. Read *The Case Against Fragrance* and you will never think about fragrance in the same way again. If you have been suffering fragrance in silence, you will know you are not alone.' Conversation 'Grenville sets out to unlock the dark science—the volatile compounds, conspiracies and carcinogens—hiding in perfume, the ingredients of which are regularly listed as alcohol, water and the mysterious catch-all "fragrance".' New Statesman 'In this appealingly written exploration, Kate uncovers the dark side of the fragrance industry, from the carcinogens in after-shave to the hormone disruptors in perfume that mimic oestrogen.' Child 'An insightful and frightening book.' Readings 'Readable, interesting and informative.' Big Book Club 'Grenville expresses hope though that our society will find solutions to the fragrant violation of personal space based on courtesy and civility rather than on regulation and policy.' Australian Book Review 'You may be familiar with Australian novelist Kate Grenville's work but she enters new territory here. After exposure to perfumes and scents delivered ill-health her way, Grenville got curious as to

why...The result is a fascinating (and worrying) exposé of the potentially damaging health effects of fragrances and the laxity of their regulation. Grenville digs into the science of scent as well as the intrigue of a multi-billion-dollar industry and makes it beautifully accessible in the process.' WellBeing 'The Orange Prize-winning novelist's discovery that she reacts badly to the artificial fragrances all around us led her to investigate what is in fragrances, what it does to people and whether it is properly tested for safety...The result is this accessible and personal book on the science of fragrance' Bookseller '[Grenville] raises valuable questions about the potentially harmful chemicals surrounding us every day and why we so unabashedly live in ignorance of them.' Reader's Digest UK, Best New Books to Read This Summer 'In some places, though, the danger [of fragrance] is beginning to be taken as seriously as passive smoking 30 years ago...it sounds silly, until you read Kate Grenville's explosive exposé and wonder why no one ever told you this stuff before.' Mail on Sunday 'An accessible, intelligent, seriously researched—and terrifying—book' Daily Mail UK [Cult Perfumes](#) - Tessa Williams 2013 Even in times of economic hardship, perfume is an affordable luxury, recognized for its ability to make us not only smell good but also feel great. No woman's dressing table or bathroom cabinet is complete without at least one bottle. *Cult Perfumes* is the first book to explore the most exclusive boutique perfumeries producing some of the world's most captivating scents. Tessa Williams documents more than 25 perfumeries and brands, ranging from the pharmacy of Santa Maria Novella in Florence, established by Dominican fathers in 1221, and the classic English company Floris, founded in 1730, to the new eponymous range created by the famed fragrance expert Roja Dove. Williams goes behind the scenes at each perfumery to interview the perfumers and explore the evolution of the company, the ethos behind the brand, and its signature scents. With a concise illustrated introduction to the history of perfume-making and features on iconic perfumes, future cult classics, and the so-called 'noses' who keep the brands attuned to today's popular scents, *Cult Perfumes* will be as alluring to lovers and collectors of perfume as the

fragrances it presents.

The Perfume Lover - Denyse Beaulieu

2013-03-19

The Perfume Lover is a candid personal account of the process of composing a fragrance, filled with sensual scent descriptions, sexy tidbits, and historical vignettes. What if the most beautiful night in your life inspired a perfume? When Denyse Beaulieu was growing up near Montreal, perfume was forbidden in her house, spurring a childhood curiosity that became an intellectual and sensual passion. It is this passion she pursued all the way to Paris, where she now lives, and which led her to become a respected fragrance writer. But little did she know that it would also lead her to achieve a perfume lover's wildest dream: When Denyse tells famous perfumer Bertrand Duchaufour at L'Artisan Parfumeur of a sensual night spent in Seville under a blossoming orange tree, wrapped in the arms of a beautiful man, the story stirs his imagination and together they create a scent that captures the essence of that night. As their unique creative collaboration unfolds, the perfume-in-progress conjures intimate memories, leading Beaulieu to make sense of her life through scents. Throughout the book, she weaves the evocative history of perfumery into her personal journey, in an intensely passionate voice: the masters and the masterpieces, the myths and the myth-busting, down to the molecular mysteries that weld our flesh to flowers. Now, just to set your nostrils aqiver: Séville à l'aube is an orange blossom oriental with zesty, green and balsamic effects, with notes of petitgrain, petitgrain citronnier, orange blossom, beeswax, incense, and lavender, and is now available at fragrance outlets in the U.S.

Perfumes - Luca Turin 2010-08-06

'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought Perfumes: The Guide by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, Guardian
Perfumes: The Guide is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

A stylish, sexy page-turner set in Paris on the eve of World War II, where Clementine, a queer American ex-pat and notorious thief, is drawn out of retirement and into one last scam when the Nazis invade. "A hint of Moulin Rouge, a whiff of Kristin Hannah's The Nightingale, a little spritz of Hitchcock's To Catch a Thief... The Perfume Thief is a pulse-pounding thriller and a sensuous experience you'll want to savor."—Oprah Daily "[A] superb novel ... This is historical fiction at its finest, vivid and beautifully rendered." —Emily St. John Mandel, author of The Sea of Tranquility
Clementine is a seventy-two year-old reformed con artist with a penchant for impeccably tailored suits. Her life of crime has led her from the uber-wealthy perfume junkies of belle epoque Manhattan, to the scented butterflies of Costa Rica, to the spice markets of Marrakech, and finally the bordellos of Paris, where she settles down in 1930 and opens a shop bottling her favorite extracts for the ladies of the cabarets. Now it's 1941 and Clem's favorite haunt, Madame Boulette's, is crawling with Nazis, while Clem's people--the outsiders, the artists, and the hustlers who used to call it home--are disappearing. Clem's first

instinct is to go to ground--it's a frigid Paris winter and she's too old to put up a fight. But when the cabaret's prize songbird, Zoe St. Angel, recruits Clem to steal the recipe book of a now-missing famous Parisian perfumer, she can't say no. Her mark is Oskar Voss, a Francophile Nazi bureaucrat, who wants the book and Clem's expertise to himself. Hoping to buy the time and trust she needs to pull off her scheme, Clem settles on a novel strategy: Telling Voss the truth about the life and loves she came to Paris to escape. Complete with romance, espionage, champagne towers, and haute couture, this full-tilt sensory experience is a dazzling portrait of the underground resistance of twentieth-century Paris and a passionate love letter to the power of beauty and community in the face of insidious hate.

Jitterbug Perfume - Tom Robbins 2003-06-17
Jitterbug Perfume is an epic. Which is to say, it begins in the forests of ancient Bohemia and doesn't conclude until nine o'clock tonight (Paris time). It is a saga, as well. A saga must have a hero, and the hero of this one is a janitor with a missing bottle. The bottle is blue, very, very old, and embossed with the image of a goat-horned god. If the liquid in the bottle actually is the secret essence of the universe, as some folks seem to think, it had better be discovered soon because it is leaking and there is only a drop or two left.

The Perfect Scent - Chandler Burr 2009-01-06

Perfumes, Cosmetics and Soaps - W. A. Poucher 2011-11-11

During the past decade there have been many changes in the perfumery industry which are not so much due to the discovery and application of new raw materials, but rather to the astronomic increase in the cost of labour required to produce them. This is reflected more particularly in the flower industry, where the cost of collecting the blossoms delivered to the factories has gone up year after year, so much so that most flowers with the possible exception of Mimosa, have reached a cost price which has compelled the perfumer to either reduce his purchases of absolutes and concretes, or alternatively to substitute them from a cheaper source, or even to discontinue their use. This development raises an important and almost insoluble problem for the perfumer, who is faced with the necessity of trying to keep unchanged the bouquet of his fragrances, and moreover, to ensure no loss of strength and diffusiveness. Of course, this problem applies more especially to the adjustment of formulae for established perfumes, because in every new creation the present high cost of raw materials receives imperative consideration before the formula is approved.

A Scent of New-Mown Hay - John Blackburn 2013

"The story has a nightmarish excitement and maintains a brilliant pace . . . the best of its kind this season." - "Detroit News" "[S]pine-chilling . . . a far-reaching plot linking the horror camps of the Nazis, the frozen wastes of Russia and the work of British Secret Intelligence. . . . [T]his is 'must' reading for horror fans." - "Calgary Herald" "I began to read: and then read and read and read." - John Creasey, "Books of the Month" "Good, insomniac science-fiction." - "Listener" With a plot featuring Cold War intrigue, Nazi mad scientists, and a pandemic that threatens to destroy humanity by mutating people into fungoid monsters, it is not hard to see why "A Scent of New-Mown Hay" (1958) became a bestseller on both sides of the Atlantic and an instant science-fiction classic. After a British ship's crew and a remote Russian village are wiped out in mysterious and horrible fashion, General Charles Kirk of British Foreign Intelligence sets out to investigate. As the plague spreads to England, Kirk's frantic search leads him from the desolate tundra of Russia to the ruins of a Nazi camp, the site of unthinkable wartime atrocities. But who is responsible? Is it a Soviet experiment gone horribly wrong, the work of a depraved madman, or something else entirely? And can it be stopped? In this, his first and still best-known novel, the prolific John Blackburn (1923-1993) introduced the formula he was to employ so successfully in his career, seamlessly blending mystery, horror, and science fiction to create a thrilling bestseller that readers found impossible to put down. This edition, the first in more than thirty years, includes a new introduction by Prof. Darren Harris-Fain and a reproduction of the scarce original jacket art by Peter Curl.

Perfume - Jean-Claude Ellena 2011-09-15

To women the whole world over, perfume means
 glamour, and in the world of perfume, Jean-
 Claude Ellena is a superstar. In this one-of-a-
 kind book, the master himself takes you through
 the doors of his laboratory and explains the
 process of creating precious fragrances,
 revealing the key methods and recipes involved
 in this mysterious alchemy. Perfume is a
 cutthroat, secretive multibillion-dollar industry,
 and Ellena provides an insider's tour, guiding us
 from initial inspiration through the mixing of
 essences and synthetic elements, to the deluxe
 packaging and marketing in elegant boutiques
 worldwide, and even the increasingly
 complicated safety standards that are set in
 motion for each bottle of perfume that is
 manufactured. He explains how the sense of
 smell works, using a palette of fragrant
 materials, and how he personally chooses and
 composes a perfume. He also reveals his unique
 way of creating a fragrance by playing with our
 olfactory memories in order to make the
 perfume seductive and desired by men and
 women the world over. Perfume illuminates the
 world of scent and manufactured desire by a
 perfumer who has had clients the likes of
 Cartier, Van Cleef & Arpels, Bulgari, and
 Hermés.

Paper Passion Perfume - Geza Schoen 2012
 Paper Passion Perfume captures the unique

bouquet of freshly printed books. Designed by
 boutique perfumer Geza Schoen in close
 consultation with Gerhard Steidl and in
 collaboration with Wallpaper* magazine, the
 perfume expresses that peculiar mix of paper
 and ink which gives a book its unmistakable
 aroma, along with the fresh scent which a book
 opened for the first time releases. Schoen spent
 days in the depths of the paper-filled Steidl
 headquarters in Göttingen, sifting through
 books, papers samples and inks, to find
 inspiration for a perfume that is true to books,
 wearable, and which ages well in time just like a
 good book. It took Schoen seventeen trials to
 preserve in his words, the right balance between
 the smell of paper as such and an enjoyable
 perfumistic aesthetic. The elaborate packaging
 of Paper Passion Perfume does more than justice
 to the perfume within. The packaging is a real
 book with a hidden cut-out compartment in
 which the bottle sits. The first pages of the book
 contain texts on the pleasures of paper and the
 Paper Passion project by Nobel Laureate Günter
 Grass, Karl Lagerfeld, Geza Schoen and
 Wallpaper* Editor-in-Chief Tony Chambers. The
 end product is a unique perfume, an homage to
 the luxurious sensuality of books and in Karl
 Lagerfeld's words, the silent smell of paper. Geza
 Schoen, born in 1969 in Kassel, has worked for
 nearly twenty years as a perfumer. He enjoyed
 professional success at a young age when he
 won the pitch for the first Diesel fragrance in
 1994, while still in his education. While working
 for Haarmann & Reimer, which later became
 Symrise, Schoen travelled to Paris, New York,
 Singapore and Buenos Aires, researching
 perfumery in local markets. He launched his
 Escentric Molecules series in 2005, after Schoen
 was introduced to British branding expert Jeff
 Lounds and his friend graphic designer Paul
 White, and This Company was formed. Schoen is
 currently working on a series of fragrances
 called The Beautiful Mind, inspired by women
 admired for their intellects.

François Coty - Roulhac Toledano 2009-01-01

"If anyone wants to understand the fate of
 France in the 20th century, this is the book to
 read." --Arthur Herman, historian and bestselling
 author of How the Scots Invented the Modern
 World. In 1906, François Coty became a
 multimillionaire within two years of creating his

first perfume, the legendary La Rose Jacqueminot. In the 30 years he ruled his perfume and cosmetics kingdom, Coty became France's first billionaire, acquiring unimaginable wealth during the most devastating war in the history of Europe, World War I. Born in Corsica next door to the home where his idol and distant relative Napoleon Bonaparte was born, Coty, with his unshakable charisma, ingenuity, and of

course, his incredibly sensitive "nose," revolutionized the world's fragrance and cosmetics industry. Now, for the first time, comes this stunning biography of France's fragrance king, the incredible story of the ambitions, loves, losses, and triumphs of one of the 20th century's most famed yet enigmatic entrepreneurial geniuses.
