**A Man Approved of God** - David J. Keyser 2007-10

David J. Keyser, Ph.D. \*\* Christian Theology \*\* This book is about the humanity of Jesus Christ. The Christian Church has neglected this important Christian truth for too long. An understanding of the humanity of Jesus has been sacrificed to our understanding of his divinity. He is indeed Divine. But it is a costly mistake to forget about his humanity; it is here that we find our identity with Him. ISBN: 9780615164557 -- Dr. David J. Keyser has served as an international theology teacher and college adjunct faculty. His earned degrees include a B.S., an M.Div, an M.S., a Th.M., and a Ph.D. in Systematic Theology with a specialization in Pneumatology (the study of The Holy Spirit) from the University of Saint Andrews in Scotland, Presbyterianism's oldest University. His interests include the humanity of Christ, The Holy Spirit and Biblical fiction.

*Guide to Energy Management: Eighth Edition, International Version* - Barney L. Capehart, Ph.D., C.E.M. 2017-06-19

The international version includes all material covered in the standard edition, but numerical data and calculations are expressed in Système International (SI) units. Bringing to the forefront the most critical areas of effective energy cost cutting, this fully revised edition of this best-selling energy manager's guide provides the very latest strategies for improving lighting, combustion processes, steam generation/distribution, and industrial waste re-utilization. This book examines the core objectives of effective energy management, and clearly illustrates the techniques and tools proven most effective in achieving results. Topics include distributed generation, energy auditing, rate structures, economic evaluation techniques, lighting efficiency improvement, HVAC optimization, combustion and use of industrial wastes, steam generation and distribution system performance, control systems and computers, energy systems maintenance, renewable energy, and industrial water management.

**Translation of Evidence Into Nursing and Health Care, Second Edition** - Kathleen M. White, PhD, RN, NEA-BC, FAAN 2016-03-17

Designed as a textbook for the DNP curriculum and as a practical resource for more seasoned health professionals, this acclaimed text encompasses an interprofessional approach to translating evidence into nursing and health care practice that is useful for both clinical and nonclinical environments. The second edition presents new chapters, three of which feature additional approaches for translating evidence into practice, new methods of information technology for translation, and interprofessional collaboration and practice for translation and three that offer 19 exemplars that illustrate actual translation work within the areas of population health and specialty practice, and in the health care system. Consistently woven throughout are the themes of integration and

application of knowledge into practice, leadership and evaluating change, leadership strategies for translation, and interprofessional applications across settings. Also included is new information about outcomes management for improvement of direct and indirect care. The second edition continues to deliver applicable theory and strategies to achieve improved outcomes, and meets the DNP core competency requirements. It features a variety of models for change as they relate to translation of research into practice. The text underscores the importance of translating evidence for use in practice to improve health care and health care delivery, and presents strategies to achieve this. It addresses the use of evidence to improve nursing education, discusses how to reduce the divide between researchers and policy makers, and presents expedients for overcoming resistance to change. Extensive lists of references, web links, and other resources enhance learning and support the development of the DNP core competencies. NEW TO THE SECOND EDITION: Addition of an esteemed co-editor Reorganized and revised for enhanced comprehension New chapters: Methods for Translation, Information Technology and Decision Support, Interprofessional Collaboration and Practice for Translation, and Data Management and Evaluation of Translation Three new exemplar chapters: Population Health Exemplars, Specialty Practice Exemplars, and Health Care System Exemplars Updated information on integration and application of knowledge into practice, leading and evaluating change, leadership strategies for translation, and interprofessional application across settings New coverage of outcomes management for improvement of direct and indirect care KEY FEATURES: Offers an in-depth guide for planning, implementing, and translating evidence Includes extensive references necessary for doctoral study Provides the perfect supplement for evidence-based practice materials that often have limited information or value for translation/implementation activities Maturation: The Adult Paradigm - Skipi Lundquist Smoot, PhD 2011-06-16

Irvine, CA - (Release Date TBD) -A clear boundary between adolescent and adult development has not yet been identified. In her enlightening new book, author Skipi Lundquist Smoot, PhD cites a majority of Adult Emotional Distress and Anxiety to fall on the continuum of Ego & Cognitive Immaturity/Maturity vs Neurosis/Wellness. Dr. Smoot defines Psychological Maturity as a necessary but usually disregarded "Missing Link" for attainment of functional resolution of anxiety. This Adult stage of Human Development leads to higher levels of ability to tolerate frustration, delay gratification and accept objective reality. Educational Methods for its achievement can be learned to help arrive at more successful life choices. We are born with a mission—to explore our own path. Psychological Maturation requires tolerance of personal differences without giving up individuality in the presence of emotional or social pressure to do otherwise. Mature choices are based on ability to think about feelings and choose to respond to them or not based on what is best for the self and others in the long run.

Restoring Coastal Louisiana - Task Committee on America's Wetlands 2004-01-01

Louisiana's coastal wetlands represent a significant natural and economic resource for the state and the nation but have been disappearing at a rate of 25 to 35 square miles each year. In the past 50 years, more than 1,500 square miles have been lost. The wetlands contain 95% of all marine species in the Gulf of Mexico, 30% of the nation's fisheries, and one of the largest habitats in the world for migratory waterfowl. More than 25% of all oil and gas used in the United States originates or passes through these wetlands, which also serve as a buffer for hurricanes. The State of Louisiana asked ASCE to convene a summit to discuss technical aspects involved in carrying out restoration programs and to report on the insights that could be drawn from the summit. This report provides conclusions and recommendations concerning the technical topics discussed at the summit as well as the

Task Committee's recommendations for a path forward.

Physical Activity and Public Health Practice - Daniel B. Bornstein, PhD 2019-01-28

Physical Activity in Public Health Practice provides the first evidence-based, practical textbook to guide readers through the process of conceptualizing, justifying, implementing, and evaluating physical activity interventions across a broad array of settings and populations. Section One begins with an overview of epidemiology, measurement, critical milestones, and the importance of moving beyond individual-level physical activity intervention, to interventions aimed at policy-, systems-, and environmental-level changes. Section Two considers planning interventions across a variety of settings and populations, including general concepts for implementation and evaluation, how to build effective coalitions, steps for developing community-, regional- or state-level strategic plans, and effectively translating policy into practice. Section Three addresses how to implement physical activity strategies across a variety of settings, including worksites, faith-based settings, healthcare settings, schools, and parks and recreation. This section also provides guidance on the complexities and challenges of targeting interventions for specific populations, such as families, older adults, persons with disabilities, as well as different strategies for urban and rural populations. Lastly, Section Four outlines effective strategies for how to evaluate interventions depending upon impact, outcome, and cost evaluation, and dissemination models for your intervention. Presented from both a research and a practice perspective while discussing the best available research, this book provides the basis for planning and implementing physical activity programs that work and can build healthier communities. This hands-on text incorporates learning objectives, real-world examples, case studies, and bulleted lists whenever possible so that the content can be digested easily not only in undergraduate and graduate course settings but also by public health workers and other health educators in practice. Written by world experts and augmented by practical applications, this textbook prepares public health students and practitioners to develop effective interventions and spur greater physical activity in their communities. Key Features: Provides effective strategies for properly measuring and increasing physical activity in communities Demonstrates how to carry out physical activity interventions across a variety of settings, including schools, communities, worksites and many more Discusses methods for directing physical activity interventions to specific populations Delivers strategies for building successful partnerships and coalitions Practical group activities, exercises, discussion questions, audio podcast discussions, and a full instructor packet accompany the textbook

Multiculturalism in the Workplace - Theresa De Jesus Paris, Ph.d. 2012-06-09

"With the ever increasing global economic interaction that often involves the workplace, it is imperative that we deepen our understanding of the dynamics of communication among different cultures. Through clear and

precise examples, Dr. Theresa Paris' book succinctly exemplifies the basic broad differences of cultures and the importance of understanding cultural interaction in the workplace, based on work developed by Dr. Geert Hofstede, a pioneer and international leading scientist in the field of International Communication. These basic principles are applicable to most cultures. This book is a must for managers and students, and offers general information to all who wish to expand their knowledge of people to people interaction." Hector Robertin Ph.D. "Multiculturalism in the Workplace engages everyone from the expert to the lay reader in principles validated through academic research. Through Barb's story, the reader is invited to explore the high level of misunderstanding among cultures and seek solutions for collaborative team development. Dr. Paris has simplified the understanding of Hofstede's research on cultural measurements in business by connecting them to different cultural traits, such as individualism and collectivism. Even the newest person to the study of multiculturalism will acquire excellent tools for interpreting actions and behaviors within his/her own environment." Sharon Seeberger, B.A.

**Case Studies in Global Health Policy Nursing** - Regina Dorman, PhD, APRN 2018-06-28

"Dorman and De Chesnay...offer a wealth of valuable information students and other healthcare providers would normally not receive until they were in the trenches of their global experience...[They] deliver...nuances of ideology about care and disease from a number of different countries, what global health policy entails and means to healthcare providers traveling the world, along with case studies from a number of guides/experienced global experts." -Lorna Kendrick, PhD, APRN, PMHCNS-BC Professor and Director, School of Nursing, California State University San Marcos From the Foreword Case Studies in Global Health Policy Nursing unpacks key global health issues and analyzes the surrounding health care policies and their impact through case studies. Designed specifically for graduate nursing students, this text explores the implications of global initiatives designed to eradicate disease and promote physical and mental health. As globalization takes a front row seat in the digital age and political dynamics shift more rapidly than ever, possibilities and opportunities for health care have arisen beyond the hospital-based focus, especially for diseases and trends that cross continental divides. Every case study contains a multidisciplinary perspective, featuring contributions by expert nurses, public health professionals, and policy researchers. Presented in a consistent format for ease of use, each case study includes an overview, background, relevant research, and in-depth information on its significance as a critical global issue. This text covers critical, current topics such as health care for transgender individuals, refugees, and patients on the autism spectrum, as well as ongoing problems like access to clean water, HIV/AIDS, and human trafficking. End-of-chapter exercises reinforce content and supplementary instructor materials are available. Key Features: Delivers topical, in-depth examination of key global issues for graduate-level nursing students Provides consistent format for each case study for ease of use Presents an interdisciplinary approach with content from expert nurses, public health professionals, and policy researchers

*Educating the Student Body* - Institute of Medicine 2013-11-30  
Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using

systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

**Safeguarding, Child Protection and Abuse in Sport** - Melanie Lang 2014-07-11

The safeguarding of children and young people participating in sport has become an increasingly prominent concern in policy-making and research communities around the world. Major organisations such as the IOC and UNICEF now officially recognize that children in sport can be at risk of exploitation and abuse, and this concern has led to the emergence of new initiatives and policies aimed at protecting vulnerable young people and athletes. This book is the first to comprehensively review contemporary developments in child protection and safeguarding in sport on a global level. The book is divided into two parts. Part One critically analyses current child protection and safeguarding policy and practice in sport across a range of countries, including the US, Canada, the UK, Australia, China and Germany, providing a global context for current policy and practice. This represents the most comprehensive review to date of the landscape of child protection and safeguarding in sport and provides a starting point for critical international comparisons. Part Two explores a range of issues related to child protection and safeguarding in sport, including many not covered in previous books, such as emotional abuse, injury and over-training. While in many instances the impetus for policy in this area has arisen from concerns about sexual abuse, the second part of this book therefore opens up a broader, more holistic approach to child and athlete welfare. By bringing together many of the leading researchers working in child and athlete protection in sport from around the world, this book is important reading for all advanced students, researchers, policy-makers or practitioners working in youth sport, physical education, sports coaching, coach education or child protection.

Health Education - Katie Fitzpatrick 2014-02-05

Health Education: Critical perspectives provides a socio-cultural and critical approach to health education. The book draws together international experts in the fields of health and education who deconstruct contemporary discourses and practices, and re-imagine a health education that both connects with young people and offers a way forward in addressing issues of health and wellbeing. Chapters within specifically link academic work on neoliberalism, healthism, risk and the body to wider discourses of health and health education. They challenge current practices and call for a re-thinking of current health programs in education settings. A unique feature of this book is the analyses of health education from both political and applied levels across a range of international contexts. The book is divided into three sections: the social and political contexts informing health education how individual health issues (sexuality, alcohol, mental health, the body and obesity, nutrition) articulate in education in complex ways alternative ways to think about health and health education pedagogy. The overall theme of the book offers a perspective that the current approach to health education - promoting a fear of ill health, self-surveillance and individual responsibility - can become a form of health fascism, and we need to be cognisant of this potential and its consequences for young people. The book will be of key interest to academics and researchers exploring the political context of health education.
