Inside ISI - S K Datta 2014-06-12

The book is relevant to all those who wish to know why and how terrorism shifted from West Asia to South and Southeast Asia and Africa. This significant shift needs to be studied in depth for policy formulation and future strategy. The book will reveal that the so called Islamic Terrorism is traceable to Pakistan from concept to reality. Pakistan as a state has provided the platform for outward and inward march of Jihadis. For this to happen, the ISI has been playing the principal role. Thus, the focus in this book is on ISI as an instrument of spreading jihadi culture in Pakistan and elsewhere.

The GoPs in the 22nd Century - Jim Scarano 2020-05-29

The GoPs in the 22nd Century attempts to show how a typical young couple go about their life at work and at leisure after the successful

implementation of 'Project Minus Four', a system which has done away with 'money' as the economic unit that used to allow unspeakable crimes; 'borders', which used to separate countries; 'organised religions', which used to create conflicts; and 'marriage' as a means of owning people. Ray and Gwen typify how life in the 22nd century can be free of anxiety, fear, poverty, violence and conflict, and Ray, as a way of thanking their great-grandparents for being instrumental in the implementation of Project Minus Four, also writes a book to expose the futility of the arguments for and against the so-called 'creation vs evolution' hypothesis, and offers the 'Third Alternative' as the solution to the problem.

Asian Strategic and Military Perspective - Ravi Shekhar Narain Singh Singh 2005

Nation-states are compelled to function within the parameters of their respective geo-political and geo-strategic environment. The behavior of nations, and the interplay of their strengths and vulnerabilities, particularly, their foreign and military posturing, is predicated on geographic, political and economic factors. Besides, historical imperatives also coalesce in determining the way States shape their policies. Many Asian countries today are threatened by a war that is of a subtle and imperceptible nature. There is also a paradigm shift in the perception of national security, especially with the blurring of the notion of internal and external security. This is reflected in the growing military expenditures of several Asian countries. This volume attempts to examine the critical factors that influence the foreign and defense policies of Asian countries. It provides comprehensive information and analyses of the strengths, needs, aspirations and compulsions that shape their strategic and military outlook..

Yearbook on Space Policy 2009/2010 - Kai-Uwe Schrogl 2011-12-30

The Yearbook on Space Policy is the reference publication analysing space policy developments. Each year it presents issues and trends in space policy and the space sector as a whole. Its scope is global and its perspective is European. The Yearbook also links space policy with other policy areas. It highlights specific events and issues, and provides useful insights, data and information on space activities. The

Yearbook on Space Policy is edited by the European Space Policy Institute (ESPI) based in Vienna, Austria. It combines in-house research and contributions of members of the European Space Policy Research and Academic Network (ESPRAN), coordinated by ESPI. The Yearbook is designed for government decision-makers and agencies, industry professionals, as well as the service sectors, researchers and scientists and the interested public.

The Galactic Whirlpool - David Gerrold 1980

Beyond the realm of the Federation, beyond the edge of the galaxy, a lost colony of humans in space drifts inexorably toward the galactic whirlpool. Kirk blazes new star trails to these strange people, isolated for centuries. Unless he can convince them that the Enterprise crew members are not demons, they will be sucked into a churning one-way funnel of doom!

Where the Crowdads Sing (Movie Tie-In) -

Delia Owens 2022-06-28

NOW A MAJOR MOTION PICTURE The #1 New York Times bestselling worldwide sensation with more than 15 million copies sold, "a painfully beautiful first novel that is at once a murder mystery, a coming-of-age narrative and a celebration of nature" (The New York Times Book Review). For years, rumors of the "Marsh Girl" have haunted Barkley Cove, a quiet town on the North Carolina coast. So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. *Where the Crowdads Sing* is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. Delia Owens reminds us that we are forever shaped by the children we once were, and that we are all subject to the beautiful and violent secrets that nature keeps.

Ghost Wars - Steve Coll 2005-03-03

The news-breaking book that has sent shockwaves through the White House, Ghost Wars is the most accurate and revealing account yet of the CIA's secret involvement in al-Qaeda's evolution. Prize-winning journalist Steve Coll has spent years reporting from the Middle East, accessed previously classified government files and interviewed senior US officials and foreign spymasters. Here he gives the full inside story of the CIA's covert funding of an Islamic jihad against Soviet forces in Afghanistan, explores how this sowed the seeds of bin Laden's rise, traces how he built his global network and brings to life the dramatic battles within the US government over national security. Above all, he lays bare American intelligence's continual failure to grasp the rising threat of terrorism in the years leading to 9/11 - and its devastating consequences.

Drugs, Oil, and War - Peter Dale Scott 2003

Peter Dale Scott's brilliantly researched tour de force illuminates the underlying forces that drive U.S. global policy from Vietnam to Colombia and now to Afghanistan and Iraq. He brings to light the intertwined patterns of drugs, oil politics, and intelligence networks that have been so central to the larger workings of U.S. intervention and escalation in Third World countries through alliances with drug-trafficking proxies. This strategy was originally developed in the late 1940s to contain communist China; it has since been used to secure control over foreign petroleum resources. The result has been a staggering increase in the global drug traffic and the mafias associated with it—a problem that will worsen until there is a change in policy. Scott argues that covert operations almost always outlast the specific purpose for which they were designed. Instead, they grow and become part of a hostile constellation of forces. The author terms this phenomenon parapolitics—the exercise of power by covert

means—which tends to metastasize into deep politics—the interplay of unacknowledged forces that spin out of the control of the original policy initiators. We must recognize that U.S. influence is grounded not just in military and economic superiority, Scott contends, but also in so-called soft power. We need a "soft politics" of persuasion and nonviolence, especially as America is embroiled in yet another disastrous intervention, this time in Iraq.

The Science of the Tour de France - James Witts 2016-06-16

Take an exclusive behind-the-scenes look at what it takes to create a world-class cyclist. James Witts invites you into the world of marginal gains to discover the innovative training techniques, nutrition strategies and cutting-edge gear that are giving today's elite cyclists the competitive advantage. Find out why Formula One telemetry is key to more bike speed; how power meters dictate training sessions and race strategy; how mannequins, computational fluid dynamics and wind-tunnels are elevating aerodynamics to the next level; why fats and training on water alone are popular in the peloton; and why the future of cycling will involve transcranial brain stimulation and wearable technology. With contributions from the world's greatest riders, including Marcel Kittel, Peter Sagan and Bauke Mollema, and the teams that work alongside them: Etixx-Quick Step, Team Sky, Tinkoff, Movistar, BMC Racing, Trek-Segafredo and many more. Also meet the teams' sports scientists, coaches, nutritionists and chefs, who reveal the pioneering science that separates Contador and Cancellara from the recreational rider. To win the Tour de France takes stamina, speed, strength... and science. *London & North Eastern Railway Magazine* - 1945

Nuclear Proliferation in South Asia - Sumit Ganguly 2008-08-06

This edited volume explores competing perspectives on the impact of nuclear weapons proliferation on the South Asian security environment. The spread of nuclear weapons is one of the world's foremost security concerns. The effect of nuclear weapons on the behaviour of newly nuclear states, and the potential for future international crises, are of particular concern. As a region of burgeoning economic and political importance, South Asia offers a crucial test of proliferation's effects on the crisis behaviour of newly nuclear states. This volume creates a dialogue between scholars who believe that nuclear weapons have stabilized the subcontinent, and those who believe that nuclear weapons have made South Asia more conflict prone. It does so by pairing competing analyses of four major regional crises: the 1987 "Brasstacks" crisis, the Indo-Pakistani crisis of 1990, the 1999 Kargil war, which occurred after the nuclear tests; and the 2001-2 Indo-Pakistani militarized standoff. In addition, the volume explores the implications of the South Asian

nuclear experience for potential new nuclear states such as North Korea and Iran.

Ecocriticism and Indigenous Studies - Salma Monani 2016-08-05

This book addresses the intersections between the interdisciplinary realms of Ecocriticism and Indigenous and Native American Studies, and between academic theory and pragmatic eco-activism conducted by multiethnic and indigenous communities. It illuminates the multi-layered, polyvocal ways in which artistic expressions render ecological connections, drawing on scholars working in collaboration with Indigenous artists from all walks of life, including film, literature, performance, and other forms of multimedia to expand existing conversations. Both local and global in its focus, the volume includes essays from multiethnic and Indigenous communities across the world, visiting topics such as Navajo opera, Sami film production history, south Indian tribal documentary, Maori art installations, Native

American and First Nations science-fiction literature and film, Amazonian poetry, and many others. Highlighting trans-Indigenous sensibilities that speak to worldwide crises of environmental politics and action against marginalization, the collection alerts readers to movements of community resilience and resistance, cosmological thinking about inter- and intra-generational multi-species relations, and understandings of indigenous aesthetics and material ecologies. It engages with emerging environmental concepts such as multispecies ethnography, cosmopolitics, and trans-indigeneity, as well as with new areas of ecocritical research such as material ecocriticism, biosemiotics, and media studies. In its breadth and scope, this book promises new directions for ecocritical thought and environmental humanities practice, providing thought-provoking insight into what it means to be human in a locally situated, globally networked, and cosmologically complex world.

Finding Metaphor in Grammar and Usage -

Gerard J. Steen 2007-11-14

Cognitive linguists have proposed that metaphor is not just a matter of language but of thought, and that metaphorical thought displays a high degree of conventionalization. In order to produce converging evidence for this theory of metaphor, a wide range of data is currently being studied with a large array of methods and techniques. *Finding Metaphor in Grammar and Usage* aims to map the field of this development in theory and research from a methodological perspective. It raises the question when exactly evidence for metaphor in language and thought can be said to count as converging. It also goes into the various stages of producing such evidence (conceptualization, operationalization, data collection and analysis, and interpretation). The book offers systematic discussion of eight distinct areas of metaphor research that emerge as a result of approaching metaphor as part of grammar or usage, language or thought, and symbolic structure or cognitive process.

Typographic Systems of Design - Kimberly Elam 2007-05-03

Typographic organization has always been a

complex system in that there are so many elements at play, such as hierarchy, order of reading, legibility, and contrast. In *Typographic Systems*, Kim Elam, author of our bestselling books, *Geometry of Design* and *Grid Systems*, explores eight major structural frameworks beyond the grid including random, radial, modular, and bilateral systems. By taking the reader through exercises, student work, and professional examples, Elam offers a broad range of design solutions. Once essential visual organization systems are understood the designer can fluidly organize words or images within a structure, combination of structures, or a variation of a structure. With clarity and substance, each system from the structured axis to the nonhierarchical radial array is explained and explored so that the reader comes away with a better understanding of these intricate complex arrangements. *Typographic Systems* is the seventh title in our bestselling *Design Briefs* series, which has sold more than 100,000 copies worldwide.

Creative Eloquence - Ingo Gildenhard 2011

This is a study of the orations of the Roman statesman Cicero. Ingo Gildenhard does not treat them simply as models of eloquence, as previous critics have done, but as repositories for Cicero's most profound thinking on perennial questions as the ethics of happiness, the notion of conscience, and the problem of divine justice.
