Ming Tea Murder - Laura Childs 2016-03
Normally Indigo Tea Shop owner Theodosia Browning wouldn't attend a black-tie affair for all the tea in China. But she can hardly say no to her boyfriend, who directs public relations for the Gibbes Museum in Charleston. Max has organised an amazing gala opening for an exhibit of a genuine eighteenth-century Chinese teahouse, and the cr me de la cr me of Charleston society is invited. But the evening takes a turn for the worse when Theodosia discovers the body of museum donor Edgar Webster. When Max becomes a suspect, it's up to Theodosia to solve the case.

GO! with Microsoft Office 2019 Getting Started - Shelley Gaskin 2019-02-18
For introductory courses in Microsoft(R) Office. Seamless digital instruction, practice, and assessment For over 17 years, instructors have relied upon the GO! series to teach Microsoft Office successfully. The series uses a project-
based approach that clusters learning

objectives around projects, rather than software features, so students can practice solving real business problems. Gaskin uses easy-to-follow Microsoft Procedural Syntax so students always know where to go on the ribbon; she combines this with a Teachable Moment approach that offers learners tips and instructions at the precise moment they're needed. Updated to Office 365, GO! with Microsoft(R) Office 365(R), 2019 Edition, Getting Started adds tips for Mac users, revised instructional projects, and improved coverage of the what, why, and how of skills application. Also available with MyLab IT By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. MyLab IT 2019 delivers trusted content and resources through an expansive course materials library, including new easy-to-use Prebuilt Learning Modules that promote student success. Through an authentic learning experience, students become sharp critical

thinkers and proficient in Microsoft Office, developing essential skills employers seek. Note: You are purchasing a standalone product; MyLab IT does not come packaged with this content. Students, if interested in purchasing this title with MyLab IT, ask your instructor to confirm the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

Skills for Success with Microsoft O - Margo Adkins 2019-01-18

For courses in Microsoft(R) Office applications. Designed for a new generation of learners Trusted for over 15 years, Skills for Success with Microsoft Office 365, 2019 Edition, Introductory

, teaches students software the way they prefer to learn it -- by seeing and doing, rather than reading blocks of text. Each skill is presented in a highly visual two-page spread with step-by-step instructions so students can easily follow along. Real-world projects build critical thinking, problem-solving, and collaborative skills, while meeting MOS objectives. The 2019 edition includes new Skills 1-10 Instructional Grader projects requiring students to read the book and complete projects in tandem. It also has a wealth of new Mac OS(R) tips and best practices to ensure all students can learn and apply the skills effectively. Also available with MyLab IT By combining trusted author content with digital tools and a flexible platform, MyLab personalizes the learning experience and improves results for each student. Humphrey "Perfect for Excel Newbies" "Great Beginner

Resource" Microsoft Excel is an incredibly powerful tool both for personal use and business use. But learning to use Excel can be overwhelming when you're confronted with a thousand-page guide that's talking about anything and everything under the sun. In Excel for Beginners, M.L. Humphrey walks you through the basics of using Excel by focusing on what you'll really need for day-to-day use. Topics covered include navigating Excel, inputting your data, formatting it, manipulating it, and printing your results. This is not a comprehensive guide, but when you're done you should know 98% of what you'll need to know to work in Excel and 100% of what you'll need on a daily basis. So what are you waiting for? Get started today. keywords: microsoft excel, ms excell, novice, beginner, introduction to excel, formatting, printing, excel basics

My Body Politic - Simi Linton 2007-01-23 "My Body Politic begins in the midst of the turmoil over Vietnam and concludes with a

meditation on the U.S. involvement in the current war in Iraq and the war's wounded veterans. While a memoir of the author's gradual political awakening, *My Body Politic* is filled with adventure, celebration, and rock and roll - Salvador Dali, James Brown, and Jimi Hendrix all make cameo appearances."--Jacket.

Financial Management for Public, Health, and Not-for-profit Organizations - Steven A. Finkler 2005

One of the few books that addresses financial and managerial accounting within the three major areas of the public sector--government, health, and not-for-profit--the Second Edition provides the fundamentals of financial management for those pursuing careers within these fields. KEY TOPICS: " With a unique presentation that explains the rules specific to the public sector, this book outlines the framework for readers to access and apply financial information more effectively. Employing an engaging and user-friendly

approach, this book clearly defines essential vocabulary, concepts, methods, and basic tools of financial management and financial analysis that are imperative to achieving success in the field. This book is intended for financial managers and general managers who are required to obtain, understand, and use accounting information to improve the financial results of their organizations, specifically within the areas of government or public policy and management, not-for-profit management, and health policy and management.

GO! with Microsoft Word 2016

Comprehensive - Shelley Gaskin 2016-03-18
Teach the course YOU want in LESS TIME! In today's fast-moving, mobile environment, the GO! with Office 2016 series focuses on the job skills needed to succeed in the workforce. With job-related projects that put Microsoft Office® into context, students learn the how and why at the moment they need to know, all in the appropriate Microsoft procedural syntax. For

Office 2016, the hallmark guided-practice to skill-mastery pathway is better than ever. Students have many opportunities to work live in Microsoft office to apply the skills they've learned. In addition, instructional projects are now available as grader projects in MyITLab, so students can work live in Office while receiving auto-graded feedback. These high-fidelity simulations match the text and provide an effective pathway for learning, practicing, and assessing their abilities. After completing the instructional projects, students can apply their skills with a variety of progressively challenging projects that require them to solve problems, think critically, and create on their own. New GO! Collaborate with Google projects allow students to apply their skills to a new environment that is already popular in many workplaces. Integrated Microsoft Office Specialist (MOS) objectives make GO! your one resource for learning Office, gaining critical productivity skills, and prepare for MOS

certification. Also available with MyITLab MyITLab® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, to engage students and improve results. HTML5 Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, so students learn more quickly and effectively, and build the critical skills needed for college and career success. Digital badges allow students to showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

Learn Excel 2016 Expert Skills with the Smart Method - Mike Smart 2016-03-04

This book is very, very different to any other computer book you have ever read. The Smart Method provides an entirely new and better way to learn Excel. You'll immediately appreciate the value and relevance of each skill as it is taught. Both IT professionals and absolute beginners will love this book because it avoids needless technical jargon and concisely explains everything you need in a simple and no-nonsense way. Amongst other things you'll learn how to:

- Use Excel 2016's new 3D maps feature to create interactive video tours
- Use Excel 2016's new Get & Transform tool to clean and combine data
- Perform What-If analysis to model and compare business scenarios
- Use advanced functions to solve real-world business problems
- Create intuitive user interfaces using form controls and recorded macros
- Master dynamic tables and structured table references
- Use Excel 2016's new Append and Merge queries to de-normalize data
- Master Excel's data modeling features to define table relationships

• Completely understand Excel's ability to create OLAP cubes

- Use OLAP pivot tables and 3D Maps to present OLAP cube data.
- Use OLAP features to gain total control over PivotTable formatting
- Break the million row limit with Excel's 2016's new Big Data features

The Point of It All - Charles Krauthammer
2019-10-22
NEW YORK TIMES BESTSELLER • A powerful collection of the influential columnist's most important works—featuring rare speeches, a major essay about today's populist movements and the future of global democracy, and a new preface by the author's son, Daniel Krauthammer “Charles will be remembered as one of the greatest public intellectuals of his generation.”—John McCain In his decades of work as America's preeminent political commentator, whether writing about statecraft and foreign policy or reflecting on more esoteric topics such as baseball, spaceflight and medical ethics, Charles Krauthammer elevated the

opinion column to a form of art. This collection features the columns, speeches and unpublished writings that showcase the best of his original thought and his last, enduring words on the state of American politics, the nature of liberal democracy and the course of world history. The book also includes a deeply personal section offering insight into Krauthammer's beliefs about what mattered most to him: friendship, family and the principles he lived by. *The Point of It All* is a timely demonstration of what made Charles Krauthammer the most celebrated American columnist and political thinker of his generation, a revealing look at the man behind the words and a lasting testament to his belief that anyone with an open and honest mind can grapple deeply with the most urgent questions in politics and in life.

Extreme Economies - Richard Davies 2020-07-20
To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the

modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, *Extreme Economies* turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

Fundamentals of Information Systems Security - David Kim 2013-07-11

PART OF THE JONES & BARTLETT LEARNING INFORMATION SYSTEMS SECURITY & ASSURANCE SERIES Revised and updated with the latest information from this fast-paced field, *Fundamentals of Information System Security, Second Edition* provides a comprehensive overview of the essential concepts readers must know as they pursue careers in information

systems security. The text opens with a discussion of the new risks, threats, and vulnerabilities associated with the transformation to a digital world, including a look at how business, government, and individuals operate today. Part 2 is adapted from the Official (ISC)2 SSCP Certified Body of Knowledge and presents a high-level overview of each of the seven domains within the System Security Certified Practitioner certification. The book closes with a resource for readers who desire additional material on information security standards, education, professional certifications, and compliance laws. With its practical, conversational writing style and step-by-step examples, this text is a must-have resource for those entering the world of information systems security. New to the Second Edition: - New material on cloud computing, risk analysis, IP mobility, OMNIBus, and Agile Software Development. - Includes the most recent updates in Information Systems Security

laws, certificates, standards, amendments, and the proposed Federal Information Security Amendments Act of 2013 and HITECH Act. - Provides new cases and examples pulled from real-world scenarios. - Updated data, tables, and sidebars provide the most current information in the field.

Loose Leaf for Microsoft Office 365: In Practice, 2019 Edition - Annette Easton, Professor 2019-05-07

Introductory Management Accounting - Charles T. Horngren 1998-08

Provides for each text chapter: an overview, study tips, chapter review formatted for easy note taking, and a self-test including a variety of test questions and problems (with full solutions and explanations).

Exploring Microsoft Office 16 - Mary Anne Poatsy 2016-01-07

This book covers introductory Microsoft Word, Excel, Access, and PowerPoint, with an

additional Windows 10 chapter. Beyond point-and-click The goal of the Exploring series is to move students beyond the point-and-click, to understanding the why and how behind each skill. And because so much learning takes place outside of the classroom, this series provides learning tools that students can access anywhere, anytime. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. Also available with MyITLab MyITLab ® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, which engages students and improves results. HTML5 Simulation exercises and Live-in-Application Grader projects come with the convenience of auto-grading and instant feedback, helping students learn more quickly and effectively.

Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. MyITLab builds the critical skills needed for college and career success. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

Applying Quality Management in Healthcare - Patrice Spath 2017

Revision of: Applying quality management in healthcare / Diane L. Kelly.

Introduction to Computers - Gary B. Shelly 2010-06-18

Get ready to learn about today's digital world with Essential Introduction to Computers. This concise text provides a visually-engaging introduction to the most current information on

computers and technology. Students will gain an understanding of the essential computer concepts they need to know to help them be successful in today's computing world.

Your Office - Amy S. Kinser 2016-01-14

This book covers introductory Word, Excel, Access, and PowerPoint, with additional sections on integrating those applications, as well as a Windows 8 workshop. Ideal for business courses. Real world problem solving for business and beyond The Your Office series prepares students to use both technical and soft skills in the real world. Hands-on technical content is woven into realistic business scenarios and focuses on using Microsoft Office® as a decision-making tool. The series features a unique running business scenario that connects all of the cases together and exposes students to using Office to solve problems relating to business areas like finance

and accounting, production and operations, sales and marketing. Each chapter introduces a realistic business case for students to complete via hands-on steps that are easily identified in blue shaded boxes. Each blue box teaches a skill and comes complete with video and interactive support. Chapters are grouped into Business Units, which collectively illustrate a specific set of business concepts to achieve AACSB-related outcomes. Each Business Unit ends with a Capstone section, testing students' ability to apply concepts and skills beyond a single chapter. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

Empty - K. M. Walton 2013-01-01

A girl tumbles into a downward spiral when a romantic encounter turns violent in this heartwrenching novel from the author of *Cracked*. Dell is used to disappointment. Ever since her dad left, it's been one let down after another. But no one—not even her best friend—understands all the pain she's going through. So Dell hides behind self-deprecating jokes and forced smiles. Then the one person she trusts betrays her. Dell is beyond devastated.

Without anyone to turn to for comfort, her depression and self-loathing spin out of control. But just how far will she go to make all the heartbreak and the name-calling stop?

GO! with Microsoft Office 365, Excel 2019 Comprehensive - Shelley Gaskin 2019-03

"For over 17 years, instructors have relied upon the GO! series to teach Microsoft Office successfully. The series uses a project-based approach that clusters learning objectives around projects, rather than software features, so students can practice solving real business problems. Gaskin uses easy-to-follow Microsoft Procedural Syntax so students always know where to go on the ribbon; she combines this with a Teachable Moment approach that offers learners tips and instructions at the precise moment they're needed. Updated to Office 365, GO! with Microsoft® Office 365®, Excel 2019 Comprehensive adds tips for Mac users, revised instructional projects, and improved coverage of the what, why, and how of skills application."--

UXD and UCD Approaches for Accessible Education - Mendoza-González, Ricardo
2020-01-03

It is widely agreed throughout the world that education and access to education are human rights. In order to accommodate the educational needs of people globally, technology will be required that supports inclusion and promotes equity for both learning processes and governance in educational institutions. In order to achieve this, technological resources must be designed to be accessible and usable for all individuals by implementing user-centered design (UCD) and user experience design (UXD) processes. UXD and UCD Approaches for Accessible Education is an academic research publication that explores thoughts and experiences on accessible and equitable education from perspectives on human-computer interaction, user research, and design thinking. It seeks to improve the understanding on how technology should be designed to truly contribute to and support accessibility and equity in education. Featuring a wide range of topics such as online courses, inclusive

education, and virtual reality, this publication is essential for academicians, curriculum designers, researchers, instructional designers, educational software developers, IT consultants, policymakers, administrators, and students.

Mood Mapping - Liz Miller 2010-03-05
Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: * The Five Keys to Moods: learn to identify the physical or emotional factors that affect your

moods * The Miller Mood Map: learn to visually map your mood to increase self-awareness * Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason

The Shaping of Western Civilization -

Michael Burger 2013-01-01

Michael Burger's goal in this inexpensive overview is to provide a brief, historical

narrative of Western civilization. Not only does its length and price separate this text from the competition, but its no-frills, uncluttered format and well-written, one-authored approach make it a valuable asset for every history student. The Shaping of Western Civilization begins with the ancient Near East and ends with globalization. Unlike other textbooks that pile on dates and facts, Shaping is a more coherent and interpretive presentation. Burger's skills as writer and synthesizer will enable students to obtain the background required to ask meaningful questions of primary sources. In addition to suggestions for further reading, this overview includes over 50 images and 22 maps.

Intelligent Systems and Applications - Kohei

Arai 2021-08-07

This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their

applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

The Vintage Mencken - Alistair Cooke 2008-11
 This historic book may have numerous typos and

missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: ...earth. r' = radius of moon, or other body. P = moon's horizontal parallax = earth's angular semidiameter as seen from the moon. f = moon's angular semidiameter. Now $\frac{r'}{r} = \frac{P}{f}$ (in circular measure), $r' = r \frac{P}{f}$ (in circular measure); $r' : r :: P : f$, or (radius of earth): (radius of moon):: (moon's parallax): (moon's semidiameter). Examples. 1. Taking the moon's horizontal parallax as $57'$, and its angular diameter as $32'$, find its radius in miles, assuming the earth's radius to be 4000 miles. Here moon's semidiameter = $16'$; $\therefore 4000 :: 57' : 16'$; $\therefore r = 400 \frac{16}{57} = 1123$ miles. 2. The sun's horizontal parallax being $8''8$, and his angular diameter $32'$ find his diameter in miles. $\therefore 8''8 : 32' :: 4000 : r$. $\therefore r = \frac{4000 \times 32 \times 60}{8.133}$ Am. 872,727 miles. 3. The synodic period of Venus being 584 days, find the angle gained in each minute of time on the earth round the sun as centre. Am. $1''-54$ per minute. 4. Find the

angular velocity with which Venus crosses the sun's disc, assuming the distances of Venus and the earth from the sun are as 7 to 10, as given by Bode's Law. Since (fig. 50) $S V: VA:: 7: 3$. But Sr has a relative angular velocity round the sun of $1''-54$ per minute (see Example 3); therefore, the relative angular velocity of $A V$ round A is greater than this in the ratio of $7: 3$, which gives an approximate result of $3''-6$ per minute, the true rate being about $4''$ per minute. Annual ParaUax. 95. We have already seen that no displacement of the observer due to a change of position on the earth's surface could apparently affect the direction of a fixed star. However, as the earth in its annual motion describes an orbit of about 92 million miles radius round the sun, the different positions in space from which an observer views the fixed stars from time to time throughout the year must be separated ...

Campbell Biology in Focus - Lisa A. Urry
2013-01-08

In 900 text pages, Campbell Biology in Focus

emphasizes the essential content and scientific skills needed for success in the college introductory course for biology majors. Each unit streamlines content to best fit the needs of instructors and students, based on surveys, curriculum initiatives, reviews, discussions with hundreds of biology professors, and careful analyses of course syllabi. Every chapter includes a Scientific Skills Exercise that builds skills in graphing, interpreting data, experimental design, and math—skills biology majors need in order to succeed in their upper-level courses. This briefer book upholds the Campbell hallmark standards of accuracy, clarity, and pedagogical innovation.

Undocumented Secrets of MATLAB-Java Programming - Yair M. Altman 2011-12-05

For a variety of reasons, the MATLAB®-Java interface was never fully documented. This is really quite unfortunate: Java is one of the most widely used programming languages, having many times the number of programmers and

programming resources as MATLAB. Also unfortunate is the popular claim that while MATLAB is a fine programming platform for prototyping, it is not suitable for real-world, modern-looking applications. Undocumented Secrets of MATLAB®-Java Programming aims to correct this misconception. This book shows how using Java can significantly improve MATLAB program appearance and functionality, and that this can be done easily and even without any prior Java knowledge. Readers are led step-by-step from simple to complex customizations. Code snippets, screenshots, and numerous online references are provided to enable the utilization of this book as both a sequential tutorial and as a random-access reference suited for immediate use. Java-savvy readers will find it easy to tailor code samples for their particular needs; for Java newcomers, an introduction to Java and numerous online references are provided. This book demonstrates how The MATLAB programming environment relies on

Java for numerous tasks, including networking, data-processing algorithms and graphical user-interface (GUI) We can use MATLAB for easy access to external Java functionality, either third-party or user-created Using Java, we can extensively customize the MATLAB environment and application GUI, enabling the creation of visually appealing and usable applications
GO! with Microsoft Excel 2013 Comprehensive - Shelley Gaskin 2013-06-25

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For use in the Office Applications course. This book is just the standalone book. The primary goal of the GO! Series, aside from teaching computer applications, is ease of implementation, with an approach that is based on clearly defined projects. Teaching and Learning Experience This program will provide a better teaching and learning experience—for you and your students.

Here's how: Engage Students with a Project-Based Approach: GO!'s project-based approach teaches students to solve real problems as they practice and learn the features. Motivate Students with Clear Instruction: Based on professor and student feedback, this text has been designed to offer clear instruction for full student comprehension. Teach the Course You Want in Less Time: The GO! series' one-of-a kind instructional system provides you with everything you need to prepare for class, teach the material, and assess your students. NOTE: This is the standalone book, if you want the book/access code order the ISBN below; ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to

register for and use Pearson's MyLab & Mastering products. NOTE: Make sure to use the dashes shown on the Access Card Code when entering the code. 0133908755 / 9780133908756 GO! with Microsoft Excel 2013 Comprehensive & MyITLab with Pearson eText -- Access Card -- for GO! with Office 2013 Package * Package consists of: 0133417336 / 9780133417333 GO! with Microsoft Excel 2013 Comprehensive
Slave Stealers - Timothy Ballard 2018-09-04
Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until

she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has

rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.
