Transformational Change for People and the Planet - Juha I. Uitto 2022-01-13

This Open Access book deals with the pressing question of how to achieve transformational change that reconciles development with environmental sustainability. It particularly focuses on the role of evaluation in finding sustainable solutions. Environment and development are closely interlinked, as are human health and ecosystem health. The pandemic that began in 2020 demonstrated in no uncertain terms how destruction of habitats has allowed hitherto unknown pathogens spill over to humans wreaking havoc on people's lives and livelihoods. We are already seeing the impacts of global climate change in terms of heatwaves, forest fires and increased storms. The Sustainable Development Goals (SDGs) explicitly recognize the equal importance of the social, economic and environmental dimensions of development. In these turbulent times, when humankind faces multiple complex challenges it is essential to know that our responses are effective and that they make a positive difference. Evaluation can provide invaluable lessons to how we design policies, strategies and programs and how we allocate limited resources between competing priorities. This book brings together key thinkers and practitioners from the public and private sectors, from major multilateral organizations and from bilateral donor agencies, to present the latest knowledge and experience on how to evaluate interventions in the nexus of environment and development. The book does not promote any particular approach or methodology, but rather emphasizes the need for mixed methods to address the question at hand in the best and most suitable manner. It covers cases from a variety of fields, from climate change mitigation and adaptation, energy efficiency and renewable energy, natural resources management, biodiversity conservation and more. This book is not a conference proceedings although it has its roots in the Third International Conference on Evaluating Environment and Development organized by the GEF Independent Evaluation Office in October 2019. The conference brought together a larger number of established and upcoming evaluators, researchers and evaluation users from the Global North and South, representing a wide variety of organizations, to discuss the frontiers of environment and development evaluation. Following the conference, the editors identified and contacted the participants who made key contributions at the conference and asked them to develop their ideas and papers into book chapters according to a coherent plan.

Prime Time Animation - Carol Stabile 2013-09-13

In September 1960 a television show emerged from the mists of prehistoric time to take its place as the mother of all animated sitcoms. The Flintstones spawned dozens of imitations, just as, two decades later, The Simpsons sparked a renaissance of primetime animation. This fascinating book explores the landscape of television animation, from Bedrock to Springfield, and beyond. The contributors critically examine the key issues and questions, including: How do we explain the animation explosion of the 1960s? Why did it take nearly twenty years following the cancellation of The Flintstones for animation to find its feet again as primetime fare? In addressing these questions, as well as many others, essays examine the relation between earlier, made-for-cinema animated production (such as the Warner Looney Toons shorts) and television-based animation; the role of animation in the economies of broadcast and cable television; and the links between animation production and brand image. Contributors also examine specific programmes like The Powerpuff Girls, Daria, Ren and Stimpy and South Park from the perspective of fans, exploring fan cybercommunities, investigating how ideas of 'class' and 'taste' apply to recent TV animation, and addressing themes such as irony, alienation, and representations of the family.

Baby Bumps - Nicole Polizzi 2013-12-31

The greatest thing Nicole Polizzi, aka "Snooki," ever did was by accident. But her son, Lorenzo, was never a mistake. When she and her boyfriend, Jionni, found out she was knocked up, they weren't married or engaged. She was only twenty-four and living with her parents—and she had zero baby experience. With a reckless, party girl TV persona to deal with, she had a lot to learn and discover in becoming a mother. In this funny and frank book, Nicole shares her experiences, everything from the first sonogram to the nipple-cracking shock of breastfeeding. In each chapter, she tells the unvarnished truth about pregnancy symptoms ("The High Price of Gas"), the ridiculousness of her baby registry ("Butt Paste and Boogie Wipes") and the lowdown on postpartum life ("Shit Happens"). There's a ton of useful information, including a list of must-have baby products, MILF style tips, how to keep "I'm a whale" preppers' bad body image in check, and how she got into the best shape of her life within six months of giving birth. Although Nicole had to give up partying, she's embracing motherhood the only way she knows how: with a fun-loving attitude—and lots of leopard print!

How To Watch Television - Ethan Thompson 2013-09-16

Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds.

Inside Rehab - Anne M. Fletcher 2013-02-07

An eye-opening tour of the addiction treatment industry explores the gap between what should happen and what does. What happens inside drug and alcohol rehabilitation centers and how rehab works are a mystery to those outside the industry – and sometimes even to those inside it. Anne M. Fletcher is a trusted New York Times bestselling health and medical writer who visited 15 addiction treatment centers—from

outpatient programs for the indigent to famous celebrity rehabs; from the sites of renowned Twelve-Step centers to several unconventional programs—to find out what really happens. What she reveals ranges from inspirational to irresponsible, and, in some cases, potentially dangerous. Real Stories: As always with her books, Fletcher gets the inside story by turning to real people who "have been there," interviewing more than 100 individuals whose compelling stories illustrate serious issues facing people in rehab and endemic in the rehab industry today. Connected Writer and Researcher who has earned the respect (and cooperation) of experts throughout the fields she's taken on. Inside Rehab is no exception—Fletcher has interviewed more than 100 professionals working in the field, including a mix of rehab staffers and administrators as well as leading academics. Rehab is constantly covered in the media, as celebrities battle their drug and alcohol issues in the spotlight and reality TV puts recovery in prime time. Addiction is no longer only a personal struggle—it's a pop culture phenomenon. Myth Busting: Fletcher exposes twelve supposed facts for the falsehoods they are, including "rehab is necessary for most people to recover from addictions;" "highly trained professionals provide most of the treatment in addiction programs;" and "drugs should not be used to treat a drug addict." Fletcher's most important finding is the alarming discrepancy between the treatments being employed at many rehab centers and the treatments recommended by leading experts and supported by scientific research. Guidance and Practical Solutions: Inside Rehab also highlights what is working, spotlights state-of-the-art programs and practices, and offers advice and guidance for people seeking quality care and treatment for themselves or those they care about. Inside Rehab is the first book to give readers a thoughtful, sensitive, and bracingly honest insider's view of the drug and alcohol rehab industry in America. For people seeking quality care for themselves or a loved one, Inside Rehab is essential reading, offering a wealth of accurate information and wise guidance.
