Private Data and Public Value - Holly Jarman 2016-02-26

This book investigates the ways in which these systems can promote public value by encouraging the disclosure and reuse of privately-held data in ways that support collective values such as environmental sustainability. Supported by funding from the National Science Foundation, the authors' research team has been working on one such system, designed to enhance consumers ability to access information about the sustainability of the products that they buy and the supply chains that produce them. Pelled by rapidly developing technology and pushed by budget cuts, politicians and public managers are attempting to find ways to increase the public value of their actions. Policymakers are increasingly acknowledging the potential that lies in publicly disclosing more of the data that they hold, as well as incentivizing individuals and organizations to access, use, and combine it in new ways. Due to technological advances which include smarter phones, better ways to track objects and people as they travel, and more efficient data processing, it is now possible to build systems which use shared, transparent data in creative ways. The book adds to the current conversation among academics and practitioners about how to promote public value through data disclosure, focusing particularly on the roles that governments, businesses and non-profit actors can play in this process, making it of interest to both scholars and policy-makers.

Selling Sustainability Short? - Janina Grabs 2020-06-30

Can private standards bring about more sustainable production practices? This question is of interest to conscientious consumers, academics studying the effectiveness of private regulation, and corporate social responsibility practitioners alike. Grabs provides an answer by combining an impact evaluation of 1,900 farmers with rich qualitative evidence from the coffee sectors of Honduras, Colombia and Costa Rica. Identifying an institutional design dilemma that private sustainability standards encounter as they scale up, this book shows how this dilemma plays out in the coffee industry. It highlights how the erosion of price premiums and the adaptation to buyers' preferences have curtailed standards' effectiveness in promoting sustainable practices that create economic opportunity costs for farmers, such as agroforestry or agroecology. It also provides a voice for coffee producers and value chain members to explain why the current system is failing in its mission to provide environmental, social, and economic co-benefits, and what changes are necessary to do better.

Good Strategy/Bad Strategy - Richard Rumelt 2011-06-09

When Richard Rumelt's Good Strategy/Bad Strategy was published in 2011, it immediately struck a chord, calling out as bad strategy the mish-mash of pop culture, motivational slogans and business buzz speak so often and misleadingly masquerading as the real thing. Since then, his original and pragmatic ideas have won fans around the world and continue to help readers to recognise and avoid the elements of bad strategy and adopt good, action-oriented strategies that honestly acknowledge the challenges being faced and offer straightforward approaches to overcoming them. Strategy should not be equated with ambition, leadership, vision or planning; rather, it is coherent action backed by an argument. For Rumelt, the heart of good strategy is insight into the hidden power in any situation, and into an appropriate response - whether launching a new product, fighting a war or putting a man on the moon. Drawing on examples of the good and the bad from across all sectors and all ages, he shows how this insight can be cultivated with a wide variety of tools that lead to better thinking and better strategy, strategy that cuts through the hype and gets results.

Labour Relations in the Global Fast-Food Industry - Tony Royle 2004-08-02

The fast-food industry is one of the few industries that can be described as truly global, not least in terms of employment, which is estimated at around ten million people worldwide. This edited volume is the first of its kind, providing an analysis of labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries: the USA, Canada, the UK, the Netherlands, Germany, Australia, New Zealand, Singapore, and Russia. The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed. Results reveal that the global fast-food industry is typified by trade union exclusion, high labour turnover, unskilled work, paternalistic management regimes and work organization that allows little scope for developing workers' participation in decision-making, let alone advocating widely accepted concepts of social justice and workers' rights.

Strategic Corporate Social Responsibility - David Chandler 2022-09-12

Strategic Corporate Social Responsibility: Sustainable Value Creation (Sixth Edition) redefines corporate social responsibility (CSR) as being central to the value-creating purpose of the firm. The primary challenge for managers today is to balance the competing interests of the firm's stakeholders' understanding that what they expect today may not be what they will expect

tomorrow. This tension is what makes CSR so complex and demanding, but it is also what makes CSR integral to the firm's strategy and day-to-day operations. In this new Sixth Edition, author David Chandler explores issues around COVID-19, the BLM movement, the supply chain crunch, and the "great resignation."

A celebration of the extraordinary courage, dedication, and sacrifice of this generation of American veterans on the battlefield and their equally valuable contributions on the home front. Starbucks CEO Howard Schultz and National Book Award nominee Rajiv Chandrasekaran honor acts of uncommon valor in Iraq and Afghanistan, including an army sergeant who runs into a hail of gunfire to protect his comrades; two marines who chose to stand and defend their outpost from an oncoming truck bomb; and a sixty-year-old doctor who joined the navy after his son was killed at war, saving dozens of lives during his service. We also see how veterans turn their leadership skills into community-building initiatives once they return home: former soldiers who aid residents in rebuilding after natural disasters; an infantry officer who trades in a Pentagon job to teach in an inner-city neighborhood; the spouse of a severely injured soldier assisting families in similar positions. These powerful, unforgettable stories demonstrate just how indebted we are to those who protect us and what they have to offer our nation when their military service is over.
