Dear Student - Elly Swartz 2022-02-15

When Autumn becomes the secret voice of the advice column in her middle school newspaper she is faced with a dilemma--can she give fair advice to everyone, including her friends, while keeping her identity a secret? Starting Middle School is rough for Autumn after her one and only BFF moves to California. Uncertain and anxious, she struggles to connect with her new classmates. The two potential friends she meets could not be more different: bold Logan who has big ideas and quiet Cooper who's a bit mysterious. But Autumn has a dilemma: what do you do when the new friends you make don't like each other? When Autumn is picked to be the secret voice of the Dear Student letters in the Hillview newspaper, she finds herself smack in the middle of a problem with Logan and Cooper on opposite sides. But before Autumn can figure out what to do, the unthinkable happens. Her secret identity as Dear Student is threatened. Now, it's time for Autumn to find her voice, her courage, and follow her heart, even when it's divided.

Introducing Transformational Grammar - Jamal Ouhalla 1999

The first edition of this book quickly established itself as one of the clearest and most readable introductions to generative grammar. Together with a complete introduction to the principles of Universal Grammar, it traced the major shifts of perspective that have influenced the developments of the theory over the last forty years. This revised and expanded new edition

introduces students with no previous training to Transformational Grammar. Covering the framework known as Principles and Parameters as well as the more recent framework known as Minimalism, it includes a range of new exercises, making it ideal for students at all levels.

Leading Digital - George Westerman 2014-09-23
Become a Digital Master—No Matter What Business You're In If you think the phrase "going digital" is only relevant for industries like tech, media, and entertainment—think again. In fact, mobile, analytics, social media, sensors, and cloud computing have already fundamentally changed the entire business landscape as we know it—including your industry. The problem is that most accounts of digital in business focus on Silicon Valley stars and tech start-ups. But what about the other 90-plus percent of the economy? In *Leading Digital*, authors George Westerman, Didier Bonnet, and Andrew McAfee highlight how large companies in traditional industries—from finance to manufacturing to pharmaceuticals—are using digital to gain strategic advantage. They illuminate the principles and practices that lead to successful digital transformation. Based on a study of more than four hundred global firms, including Asian Paints, Burberry, Caesars Entertainment, Codelco, Lloyds Banking Group, Nike, and Pernod Ricard, the book shows what it takes to become a Digital Master. It explains successful transformation in a clear, two-part framework: where to invest in digital capabilities, and how to lead the transformation. Within these parts, you'll learn:

- How to engage better with your customers
- How to digitally enhance operations
- How to create a digital vision
- How to govern your digital activities

The book also includes an extensive step-by-step transformation playbook for leaders to follow. *Leading Digital* is the must-have guide to help your organization survive and thrive in the new, digitally powered, global economy.

All the authors of this book are from IITs & IISc and after joining the industry realized gap between university education and the practical FEA. Over the years they learned it via interaction with experts from international community, sharing experience with each other and hard route of trial & error method. The basic aim of this book is to share the knowledge & practices used in the industry with experienced and in particular beginners so as to reduce the learning curve & avoid reinvention of the cycle. Emphasis is on simple language, practical usage, minimum mathematics & no pre-requisites. All basic concepts of engineering are included as & where it is required. It is hoped that this book would be helpful to beginners, experienced users, managers, group leaders and as additional reading material for university courses.

Aditya Chopra Relives - Aditya Chopra 2014 "Twenty-four year old Aditya Chopra released his defining film, Dilwale Dulhania Le Jayenge (The Brave-Heart Will Take the Bride) on Diwali, 20 October 1995. The film swiftly made box-office gold and created a deep impression on audiences across generations. This timeless romance has now famously played for a thousand consecutive weeks at Maratha Mandir, Mumbai (where it continues to play), making it India's longest-running film. Produced by Yash Chopra and widely known as "DDLJ", the film brought a new twist to the familiar love story. Raj (Shah Rukh Khan) and Simran (Kajol) fall in love on their travels through Europe and instead of rebelling against an objecting parent, Raj decides to win over Simran's uncompromising father. In 1996, at the height of the DDLJ craze, the young Aditya Chopra decided to step away from the limelight and despite his ever-

increasing power as both producer and studio-owner, he has remained largely unseen and unheard for two decades. People outside his immediate circle know little about him and as a result, he has gained the reputation of being an enigma in a world of celebrities and glamour that thrives on constant visibility. Twenty years after the release of the film, the private and reclusive Aditya Chopra traces the journey that led to the making of his first film - he discusses his influences, shares insights on cinema and provides fascinating detail about how he went about making the movie that changed his life and that has now become part of the lives of audiences across generations. With [previously] unknown information and anecdotes about DDLJ in the words of its director ... [this] is the story of this phenomenally popular film that turned the tide of Hindi cinema in the 1990s and has rightfully earned pride of place among the most successful and acclaimed Indian films of all time"--Publisher's description.

Water Ethics - David Groenfeldt 2013-10-01

This book introduces the idea that ethics are an intrinsic dimension of any water policy, program, or practice, and that understanding what ethics are being acted out in water policies is fundamental to an understanding of water resource management. Thus in controversies or conflicts over water resource allocation and use, an examination of ethics can help clarify the positions of conflicting parties as preparation for constructive negotiations. The author shows the benefits of exposing tacit values and motivations and subjecting these to explicit public scrutiny where the values themselves can be debated.

The aim of such a process is to create the proverbial 'level playing field', where values favoring environmental sustainability are considered in relation to values favoring short-term exploitation for quick economic stimulus (the current problem) or quick protection from water disasters (through infrastructure which science suggests is not sustainable). The book shows how new technologies, such as drip irrigation, or governance structures, such as river basin organizations are neither "good" nor "bad" in their own right, but can serve a range of interests which are guided by ethics. A new ethic of coexistence and synergies with nature is possible, but ultimately depends not on science, law, or finances but on the values we choose to adopt. The book includes a wide range of case studies from countries including Australia, India, Philippines, South Africa and USA. These cover various contexts including water for agriculture, urban, domestic and industrial use, the rights of indigenous people and river, watershed and ecosystem management.

Geography Of India - Husain 2012

Integrated Solid Waste Management: A Lifecycle Inventory - P.R. White 2012-12-06

Life is often considered to be a journey. The lifecycle of waste can similarly be considered to be a journey from the cradle (when an item becomes valueless and, usually, is placed in the dustbin) to the grave (when value is restored by creating usable material or energy; or the waste is transformed into emissions to water or air, or into inert material placed in a landfill). This preface provides a route map for the journey the reader of this book will undertake. Who? Who are the intended readers of this book? Waste managers (whether in public service or private companies) will find a holistic approach for improving the environmental quality and the economic cost of managing waste. The book contains general principles based on cutting edge experience being developed across Europe. Detailed data and a computer model will enable operations managers to develop data-based improvements to their systems. Producers of waste will be better able to understand how their actions can influence the operation of environmentally improved waste management systems. Designers of products and packages will be better able to understand how their design criteria can improve the compatibility of their product or package with developing, environmentally improved waste management systems. Waste data specialists (whether in laboratories, consultancies or environmental managers of waste facilities) will see how the scope, quantity and quality of their data can be improved to help their colleagues design more effective waste management systems.

Mistakes, Errors and Failures across Cultures - Elisabeth Vanderheiden 2020-03-14

This volume provides comprehensible, strength-based perspectives on contemporary research and practice related to navigating mistakes, errors and failures across cultures. It addresses these concepts across cultural contexts and explores any or all of these three concepts from a positive psychology or positive organisational perspective, highlighting their potential as resources. The volume further discusses the consequences of errors and failures at individual, organisational and societal levels, ranging from severe personal problems to organisational and collective crises, perspectives how those can be turned into opportunities for contingent and sustainable improvement processes. The book shows that there are significant cultural differences in the understanding, interpretation and handling of errors and failures. This volume provides practical guidance for transcultural understanding of mistakes, errors and failure through new models, ideas for self-reflection, therapeutic and counselling interventions and organisational change management processes. This book is a must for researchers and practitioners working on mistakes, errors and failures across cultures and disciplines!

Democratizing Forest Governance in India - Sharachchandra Lele 2014-07-10

The forest sector in India is currently going through an unprecedented churning. Every dimension of forest-related decision-making, including rights of local communities, conversion of forests to non-forest uses and setting aside forests for wildlife conservation, has become the subject of intense scrutiny, debate and change.

The involvement of multiple actors, from local communities to the Supreme Court, marks a shift in the discourse from forest management to forest governance. Questions of forest rights, responsibilities, regulatory structures, transparency and accountability have increasingly become central to the discourse. The need to democratize all these components of forest governance is being repeatedly articulated. This book highlights this shift in the discourse and analyses the complex issues involved in bringing about democratic governance of forests in India. The essays in this

book review developments over the last two decades along four dimensions: forests for local management, forests for wildlife conservation, conversion to non-forest purposes, and the wider socio-economic context and how it poses challenges to the idea of democratic governance. The themes range from the relevance of the Joint Forest Management programme, the contribution of the Forest Rights Act, the complexities of the Godavarman case and the changes in the Wildlife Act to challenges posed by shifting cultivation, scientific versus traditional knowledge, and the effect of economic growth on forest dependence.
