Fundamentals of Performance

Improvement is a substantially new version of the down-to-earth, how-to guide designed to help business leaders, practitioners, and students understand the science and art of performance technology and successfully implement organizational and societal change. Using the Performance Improvement / Human

Performance Technology (HPT) model, the expert authors explain step-by-step how to spot performance indicators, analyze problems, identify underlying causes, describe desired results, and create workable solutions. “It does not matter what function you align yourself to in your organization, this book allows you to tap into the secrets that drive organizational success. Several books work to define what is performance improvement and performance technology. This one also provides insights into the Why? And How?” —CEDRIC T. COCO, CPT, SVP, Learning and Organizational Effectiveness, Lowe’s Companies “Fundamentals of Performance Improvement is full of practical models and tools for improving the world by partnering with customers, clients, constituents, and colleagues. It provides a path forward for successful transformation and performance improvement at personal, group and collective levels. It is a must read for leaders and consultants seeking to advance opportunities in

new and emerging situations.” —DIANA WHITNEY, PhD, president, Corporation for Positive Change “If you have an interest in performance improvement, this is simply the best available book on the topic. Understanding Quantitative and Qualitative Research in Psychology is the most hands-on, accessible and approachable guide to the entire research process, which fully explores both quantitative and qualitative methods to give students the knowledge and confidence they need. Students are presented with a practically-focused guide to carrying out psychological research and are taken from formulating a research question through to collecting data, analysing datasets statistically with SPSS or qualitatively with a range of approaches, and finally presenting and thinking critically about research findings. They are shown the importance of research ethics, and coverage of the replication crisis and the open science movement is considered throughout. The online resources present a wealth of opportunities for students to practice what they have learned, and the title is supported by an excellent range of video support materials for both the qualitative

and quantitative sections, including SPSS screencasts for all relevant chapters, and a range of videos on interview skills. Digital formats and resources Understanding Quantitative and Qualitative Research in Psychology is available for students and institutions to purchase in a variety of formats, and is supported by online resources. Cash transfers and women's control over decision-making and labor supply in Egypt -

El-Enbaby, Hoda 2019-12-23

Women's control over decision-making within their family, particularly regarding the use of household income, can play an important and long-lasting role in shaping their well-being and that of their children. Cash transfer programs often target women in order to increase their control over household resources. Empirical evidence on the effectiveness of this approach is mixed and suggests the importance of local context. We present evidence on the effect of cash transfers on women's control over decision-making in the MENA region, where little evidence is available and where cultural norms around women's roles differ from more-studied regions. Using a regression discontinuity approach, we identify the impact of Egypt's "Takaful" national cash transfer program on women's control over decision-making and labor supply. Receiving cash transfers mostly reduced women's reported ability to influence household decisions, particularly regarding child

healthcare. The loss of control over decision-making was greater for women with less than primary education. Other effects of the program include a decline in women's employment and an increase in men's involvement in spheres of decision-making usually controlled by women. These results are robust to changes in model specification. We present suggestive evidence from mediation analysis that the negative effects on women's control over decision-making was directly related to these declines in employment and increase in men's involvement in female spheres. The negative findings are not wholly supported by complementary qualitative work in which women reported more positive perceptions of the program's impacts.

Deconversion - Heinz Streib 2011-07-12

This book presents case studies and empirical data of a phenomenon which increasingly gains popularity in Western societies: deconversion. There is, the authors argue, no better word than deconversion to describe processes of

disengagement from religious orientations because these have much in common with conversion. Termination of membership may eventually be the final step of deconversion, but it involves biographical and psychological dynamics which can and need to be reconstructed by qualitative approaches and analyzed by quantitative instruments. In the Bielefeld-based Cross-Cultural Study on Deconversion disengagement processes from a variety of religious backgrounds in the USA and in Germany were examined, ranging from well-established religious organizations to new religious and fundamentalist groups. Nearly 1,200 persons participated in the study and were interviewed from 2002 to 2005. In the focus of the study are 100 deconverts from the USA and from Germany who were examined with narrative interviews, faith development interviews and an extensive questionnaire. For case study elaboration, the study followed a research design with an innovative triangulation

of qualitative and quantitative data. Four chapters, corresponding to four types of deconversion, present 21 case studies. The highlights of the research project are new data on spirituality – the deconverts in particular appear to prefer a »more spiritual than religious« self-identification – and in-depth analyses of a variety of deconversion narratives with special focus on personality factors, motivation, attitudes, religious development, psychological well-being and growth, religious fundamentalism and right-wing authoritarianism. The results of this project which was funded by the Deutsche Forschungsgemeinschaft are of special relevance for counselling and pastoral care, for religious education and for people concerned with administration and management of religious groups and churches, but also for a wider audience interested in contemporary changes in the religious fields in the USA and Germany.

Political Science Research in Practice - Akan Malici 2013

Nothing rings truer to those teaching political science research methods: students hate taking this course. Tackle the challenge and turn the standard research methods teaching model on its head with *Political Science Research in Practice*. Akan Malici and Elizabeth Smith engage students first with pressing political questions and then demonstrate how a researcher has gone about answering them, walking through real political science research that contributors have conducted. Through the

exemplary use of survey research, experiments, field research, case studies, content analysis, interviews, document analysis, statistical research, and formal modeling, each chapter introduces students to a method of empirical inquiry through a specific topic that will spark their interest and curiosity. Each chapter shows the process of developing a research question, how and why a particular method was used, and the rewards and challenges discovered along the way. Students can better appreciate why we need a science of politics--why methods matter--with these first-hand, issue-based discussions. The following features make this an ideal teaching tool: An introductory chapter that succinctly introduces key terms in research methodology Key terms bolded throughout and defined in a glossary Broad coverage of the most important methods used in political science research and the major subfields of the discipline A companion website designed to foster online active learning An instructor's

manual and testbank to help incorporate this innovative text into your syllabus and assessment.

The Science and Art of Interviewing -
Kathleen Gerson 2020-10-15

Qualitative interviewing is among the most widely used methods in the social sciences, but it is arguably the least understood. In *The Science and Art of Interviewing*, Kathleen Gerson and Sarah Damaske offer clear, theoretically informed and empirically rich strategies for conducting interview studies. They present both a rationale and guide to the

science-and art-of in-depth interviewing to take readers through all the steps in the research process, from the initial stage of formulating a question to the final one of presenting the results. Gerson and Damaske show readers how to develop a research design for interviewing, decide on and find an appropriate sample, construct a questionnaire, conduct probing interviews, and analyze the data they collect. At each stage, they also provide practical tips about how to address the ever-present, but rarely discussed challenges that qualitative researchers routinely encounter, particularly emphasizing the relationship between conducting well-crafted research and building powerful social theories. With an engaging, accessible style, *The Science and Art of Interviewing* targets a wide range of audiences, from upper-level undergraduates and graduate methods courses to students embarking on their dissertations to seasoned researchers at all stages of their careers.

Mobile Communication and Low-Skilled Migrants' Acculturation to Cosmopolitan Singapore - Rajiv George Aricat 2018-04-16

Mobile Communication and Low-Skilled Migrants' Acculturation to Cosmopolitan Singapore examines the role of mobile communication in the acculturation of South Asian labor migrants to Singapore, adopting a mobile phone appropriation model and following a pluralistic-typological approach. While presenting data from a questionnaire survey and interviews with low-skilled migrants from Bangladesh and India in Singapore, it explores

how their specific social conditions, including their transient status and low entitlements in their host country, influenced their mobile phone appropriation. It considers the links these migrants established and retained with their countries of origin and residence to identify several types of appropriation and acculturation types among the various populations.

Frequently Asked Questions in Quantitative Finance - Paul Wilmott 2010-05-27

Paul Wilmott writes, "Quantitative finance is the most fascinating and rewarding real-world application of mathematics. It is fascinating because of the speed at which the subject

develops, the new products and the new models which we have to understand. And it is rewarding because anyone can make a fundamental breakthrough. "Having worked in this field for many years, I have come to appreciate the importance of getting the right balance between mathematics and intuition. Too little maths and you won't be able to make much progress, too much maths and you'll be held back by technicalities. I imagine, but expect I will never know for certain, that getting the right level of maths is like having the right equipment to climb Mount Everest; too little and you won't make the first base camp, too much and you'll collapse in a heap before the top. "Whenever I write about or teach this subject I also aim to get the right mix of theory and practice. Finance is not a hard science like physics, so you have to accept the limitations of the models. But nor is it a very soft science, so without those models you would be at a disadvantage compared with those better

equipped. I believe this adds to the fascination of the subject. "This FAQs book looks at some of the most important aspects of financial engineering, and considers them from both theoretical and practical points of view. I hope that you will see that finance is just as much fun in practice as in theory, and if you are reading this book to help you with your job interviews, good luck! Let me know how you get on!"
